

10mw solar power plant Trinidad and Tobago

Who is building the largest solar project in Trinidad and Tobago?

Today, the Government of Trinidad and Tobago has officially given the green light to project partners, bp, Shell and Lightsource bp to begin construction of the largest solar project in the Caribbean.

Who owns 148mw solar project in Trinidad & Tobago?

The Government of the Republic of Trinidad and Tobago (GoRTT) has approved the consortium partners 148MWp solar project. The consortium have reached the Final Investment Decision, with bp and Shell initially having joint shareholdings of the project (50/50).

How much solar power will the Caribbean have?

The two sites will have a combined capacity to generate a total of 112.2 mw of solar electricity, more than the total generating capacity of most islands in the Eastern Caribbean. This will be the largest solar project in the Caribbean when complete.

Can Lightsource BP accelerate the energy transition in Trinidad & Tobago?

With the experience of bp and Shell, as major operators in Trinidad and Tobago's energy industry, combined with Lightsource bp's global solar expertise, the group represents the huge potential to accelerate the energy transition through collaboration.

Where will a new solar power plant be built?

The project will be constructed at two sites, one in Brechin Castle, near the Point Lisas industrial estate, and the other will be built in Orange Grove, near Trinicity. The two sites will have a combined capacity to generate a total of 112.2 mw of solar electricity, more than the total generating capacity of most islands in the Eastern Caribbean.

With locations at Brechin Castle (with 122 MWp) and Orange Grove (with 26 MWp), the project is expected to produce enough power for the equivalent of 42,500 homes. "This is a big deal for Trinidad and Tobago, as the first commercial-scale solar project and the largest in the Caribbean, and it's great to see the energy transition in Trinidad ...

Guyana's closest Caribbean neighbour, Trinidad and Tobago, recently granted the approval of a 112.2 megawatt (MW) solar project, expected to commence construction in March this year.

T& TEC and a consortium comprising bpTT, Shell T& T and Lightsource BP signed the agreement to develop two solar power plants at Brechin Castle and Orange Grove, providing 112 megawatts (MW) of...

The Government of the Republic of Trinidad and Tobago (GoRTT) and the consortium partners, bp

10mw solar power plant Trinidad and Tobago

Alternative Energy Trinidad and Tobago (bpATT), Shell Renewables Caribbean (Shell), and Lightsource bp, ...

The two sites will have a combined capacity to generate a total of 112.2 mw of solar electricity, more than the total generating capacity of most islands in the Eastern Caribbean. This will be the largest solar project in the Caribbean when complete.

The solar project is being constructed by a consortium made up of bp Alternative Energy Trinidad and Tobago (bpATT) and Shell Renewables Caribbean (Shell). Lightsource bp is the construction manager for the project. ...

The Solar PV Project is set to be the first utility scale renewable power generation facility within Trinidad and Tobago, set to deliver 112.2MW onto the grid. The arrival to this point is a testimony of the Government's steadfast commitment to decarbonizing the power sector and represents an energy milestone as we create a new energy mix to ...

bp has teamed up with Shell to develop Trinidad and Tobago's first large scale solar project over two sites - Brechin Castle and Orange Grove

The solar project is being constructed by a consortium made up of bp Alternative Energy Trinidad and Tobago (bpATT) and Shell Renewables Caribbean (Shell). Lightsource bp is the construction manager for the project. The project is expected to produce approximately 300,000MWh of green electricity per year.

The project is expected to produce approximately 300,000MWh of green electricity per year - enough to power the equivalent of 42,500 homes and helping to reduce carbon emissions. Development and construction of the project is being managed by Lightsourcebp, a global leader in the

Dominica is progressing with its first geothermal power project, with site preparation for the 10 MW plant underway. Construction is expected to begin by early 2025, following the completion of excavation work.

The two sites will have a combined capacity to generate a total of 112.2 mw of solar electricity, more than the total generating capacity of most islands in the Eastern Caribbean. This will be the largest solar project in the ...

The Government of the Republic of Trinidad and Tobago (GoRTT) and the consortium partners, bp Alternative Energy Trinidad and Tobago (bpATT), Shell Renewables Caribbean (Shell), and Lightsource bp, have completed negotiations on the development of a 112MWac/148MWp solar project.

The project is expected to produce approximately 300,000MWh of green electricity per year - enough to power the equivalent of 42,500 homes and helping to reduce carbon emissions. Development and construction
