

## 6 kva solar system price Lithuania

Solar Quotes estimates that the average cost for a 6kW solar system in Australia is currently between \$5,200 - \$8,700, including any solar subsidies and depending on installation specifics and individual components. If you're considering adding extra panels and buying a 6.6kW system, that price increases to between \$5,500 and \$9,000.

Adding a battery to a solar solution increases the consumption of self-produced energy by up to 20%. This also results in greater financial savings at the expense of electricity purchased from the network and network charges.
