developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

Energy storage developer Akaysha Energy - which is owned by major investment group Blackrock - announced via business networking site LinkedIn this week that its 205MW/410MWh battery energy storage system (BESS) in Brendale, a suburb of Queensland's capital Brisbane, has reached its FID.

As an energy company, we acknowledge the importance of respecting and nurturing the environment. We are committed to working in harmony with Indigenous communities and honouring their traditional knowledge in our pursuit of sustainable energy solutions.

Discover innovative and sustainable renewable energy solutions with Akaysha Energy. Powering Australia's future with clean, reliable energy.

Today's Most Tomorrow Company. | Akaysha Energy brings together specialist experience in energy markets, technology, development and capital solutions to unlock the energy future.

The proposed Brinkworth Battery Energy Storage System (BESS) will have a capacity of 250MW/1000MWh and provide up to 4 hours of energy storage. Designed to store and generate electricity as part of the national electricity grid, the Brinkworth Project will help support Australia's energy transition as a cost effective way of integrating ...

At 850MW, the project is currently the single biggest Dispatchable Unit Identifier (DUID) in the NEM, Akaysha Energy chief engineer Nick Finch noted. The project got Generator Performance Standard (GPS) clearance to connect to the grid in April.

Tony Fullelove has almost twenty-five years" experience in the energy industry, leading large scale and distributed renewable projects and delivering major transformational programs across the energy sector.

US-based investment giant BlackRock has acquired Akaysha Energy, an Australian firm that has more than 1GW of energy storage capacity in its portfolio. The financial details of the deal have not been disclosed.
