

Algeria maru systems

Who is Maru systems?

Maru Systems started in 2007 as an installation company. Maru Systems is an innovative and dynamic company from the Zuidoostbeemster (Noord-Holland) that specializes in energy saving and energy technology. Functional sustainability is at the core of Maru Systems' business philosophy.

Who is Maru group?

Maru Group comprises three businesses: Maru Solar, Maru Greentech and Maru Innovations. Together we are fulfilling the growing demand for green electricity, with innovation being our mainspring. Maru Solar has been specialising in bespoke solar power systems for the consumer and commercial markets since 2007.

Who is Maru innovations?

Maru Innovations is the innovative entity within our group, focusing on improvement and development. We keep developing existing hybrid technology and devising new energy concepts. CO2 reduction is our point of departure, though we also consider practical utilisability and user-friendliness.

What makes Maru GreenTech unique?

Our R&D and production divisions are engaged in creating a diverse portfolio of products. Maru Greentech's key, most well-known client is green energy rental firm De Groene Aggregaat. Innovation is inextricably intertwined with efforts to make society more sustainable and with the energy landscape in which MARU is situated.

Who is Maru solar?

Maru Solar has been specialising in bespoke solar power systems for the consumer and commercial markets since 2007. Solar panels are now an indispensable part of our society. It goes without saying that you can buy solar panels from Maru Solar.

Why should you buy solar panels from Maru solar?

Solar panels are now an indispensable part of our society. It goes without saying that you can buy solar panels from Maru Solar. But even more importantly, we will contribute our thoughts on optimum use of solar energy, advising on the best way to generate sustainable energy using solar collectors and store it using (home) batteries.

Maru Greentech develops and supplies high-quality, sustainable (mobile) energy facilities. One of these innovative products is the Mobile Energy Supply Unit (MESU). The energy transition is in full swing and is transforming the energy landscape.
