

The 2 GW procurement exercise will deliver 15 solar projects, with capacities ranging from 80 MW to 220 MW, in 12 provinces across the country. The tender attracted 20 bidders and a total of 77...

A total of 19 contracts have been signed by representatives of Algerian state-owned utility Sonelgaz for the construction of 20 solar projects with a cumulative capacity of 3 GW.

The two projects are parts of the 15 gigawatts photovoltaic network planned and constructed for Algeria by 2035. As key projects under Algeria's national energy transition strategy, the two projects are highly valued and have been promoted by the Algerian government.

Algeria has received 73 bids, both domestic and international, for 15 solar power projects with a total capacity of 2,000 megawatts (MW). Sonelgaz, the state-owned electricity and gas distribution company, oversaw the bidding process.

By the end of 2023, Algeria had 437 MW of solar generation capacity, according to the national Commission for Renewable Energies and Energy Efficiency (CEREFE).

Another solar PV project located in El Oued, with a production capacity of 300MW, has been bagged by CSCEC and SHAEMS, a leading Algerian renewable energy company jointly established by state-owned Sonatrach and Sonelgaz.

1 · Algeria Operators battle it out over Algerian solar power. After several past failures, Algiers is determined to start exploiting its huge solar energy potential, and a new 2,000MWp project in the south of the country is attracting widespread interest.

Algeria's new 3 GW solar tenders mark a major shift in its energy landscape, aiming to expand solar beyond remote areas and develop a local renewable energy sector. With high solar potential, the tenders reflect Algeria's commitment to reduce its reliance on gas and boost domestic solar capacity.

Sonelgaz Algeria Solar PV Park is a 233MW solar PV power project. It is located in Adrar, Algeria. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active.
