

American Samoa smartflower solar price

How much does a smartflower solar panel cost?

Now, let's talk about the numbers. How much does the SmartFlower cost? Before applying for all incentives and tax credits, the SmartFlower solar panel system ranges in price from \$25,000 to \$30,000 with the average cost to install at \$27,000. There are two models that you can choose from, and this is why the price can vary.

What is smartflower solar?

SmartFlower Solar produces unique, ground-mounted solar panel systems that include a sun tracker and a number of other high-tech features. This 'smart' solar panel system is an all-in-one, self-sustaining system that differs greatly from the traditional monocrystalline or polycrystalline rooftop panels.

How much does it cost to install a smartflower?

The cost to install a Smartflower ranges from \$25,000 to \$30,000, with the average U.S. customer likely paying around \$27,000. Pricing for the Smartflower PLUS and the Smartflower with integrated car charging is not yet available. The best way to compare solar panel system prices is to determine the cost per watt of electricity generation.

What is the warranty on a smartflower solar panel system?

The SmartFlower solar panel system has a system warranty of 5 years and a module performance warranty of 25 years. This also differs from other solar panel systems that have 20 to 25-year warranties for both the system and performance. Even most ground-mounted systems with sun-tracking capability have 10-year system warranties.

Can a smartflower solar system save you money?

While you can get more solar installed for less with a traditional photovoltaic system, the Smartflower can still save you a ton of money over the next 25 years. With 5,510 kWh of electricity produced per year in Los Angeles, the Solarflower rivals the output of a 4 kW rooftop solar panel system.

How much power does a smartflower Solar System produce?

Smartflower published an output expectancy map on their website showing the amount of power you can expect to get out of their 2.5 kW array. With 5,510 kWh per year in Los Angeles, the Solarflower rivals the output of a 4 kW rooftop solar panel system.
