

Australian solar container power certification company

What is Solar Accreditation Australia?

Solar Accreditation Australia (SAA) is a not-for-profit organisation dedicated to promoting the effective accreditation of designers and installers under the SRES Scheme, which encompasses both on-grid and off-grid solar, wind, and hydro systems.

Can solar power a shipping container?

We design and build shipping containers featuring integrated solar systems that can be used to provide microgrid energy solutions. The solar array is mounted directly onto the container, and can provide both off-grid and grid-tied functionality, with all necessary equipment to ensure safe and efficient operation installed within.

What is the best solar company in Australia?

Overall, the best solar company in Australia is one that consistently delivers high-quality products, excellent customer service, and exceptional value to its clients. SunWiz is the source relied upon for Top Solar Companies in Australia. Are you the top solar power company in Australia?

Who is RPC solar?

Since 1987, RPC has designed and delivered off-grid and hybrid solar projects across eight countries, powering resorts, schools, and remote communities. RPC has been pioneering solar since 1987. From off-grid independence to on-grid efficiency, we deliver solutions that put you in control of your energy future.

Who are solar installers?

Our core business activity is installing solar systems for residential, commercial and government organisations, as well as the distribution of solar and energy efficiency products to dozens of companies around the country. We have installed over 60,000 solar systems within group, and are the leading rooftop solar installer in Australia by volume.

How do I become a SAA Accredited Installer?

To become accredited with SAA, you will need to supply your photo ID, a selfie, and a copy of your training certificate. Installers and designers can apply for different types of accreditation, depending on the work they want to do.
