

Austria breathe battery technologies

Who is breath battery technologies?

Breathe Battery Technologies | 9,858 followers on LinkedIn. We make batteries better. A lot better. | Breathe is more than a battery performance company. We help you do more with the power you have. Because we believe an electrified future requires superior customer experiences.

Is breath a good battery management software?

As Campbell tells it, Breathe's software is pretty lightweight. On a typical battery management system, "there's about 99.9% of the software that we don't touch," he said. Despite that relatively small code footprint, Campbell thinks that software like Breathe's and others' suggest that batteries are about to enter a new era.

Does breathe have a battery performance solution?

UK startup Breathe Battery Technologies reckons it has the solution- or part of it, at least. "Breathe is a battery performance company," says Dr Ian Campbell, CEO, Breathe Battery Technologies.

Why is breath battery sourcing with Volvo Cars?

"We're very pleased with this investment and sourcing agreement with Volvo Cars and support their exciting journey towards full electrification," says Dr Ian Campbell, CEO of Breathe Battery Technologies. "Deploying our technology at scale on Volvo's next generation EV platform opens doors to innovative car designs and performance improvements.

Why should you use breath physics-based battery management software?

With Breathe physics-based battery management software, you can deliver products with faster charging, greater cycle life and zero compromise on safety. As product leaders and battery experts, you constantly have to make impossible trade-offs between charge speed, cycle life, energy density, and profit margins. Until now.

Does breath work with existing batteries?

A lot of battery enhancements require a new cell or pack design but Breathe has taken a different approach, creating software that works with existing hardware. "A lot of the capability locked up in batteries isn't being exploited," says Campbell. "The idea was to extract this latent capability.

In the process, he and his colleagues at Breathe Battery Technologies have developed a bit of software that can be slipped into just about any lithium-ion battery in use today, endowing it with...

Breathe Battery Technologies has been selected for The Europas 100 list, joining some of Europe's most innovative and high-potential startups. Since its founding in ...

Austria breathe battery technologies

At the product level, Breathe Charge and Breathe Life, replace these outdated charging strategies with adaptive solutions. Unlike traditional methods, our approach dynamically adjusts to the battery's needs, ensuring longevity and optimal performance.

Breathe's physics-based battery management software increases charge speed and cycle life, never compromising on safety. That's why some of the most iconic electric vehicle and consumer electronics brands trust us.

Volvo Cars has partnered up with Breathe Battery Technologies (Breathe), becoming the first car company to get access to the latest version of its patented, algorithm-enabled charging software for use on our new generation ...

Breathe Battery Technologies has been selected for The Europas 100 list, joining some of Europe's most innovative and high-potential startups. Since its founding in 2009, The Europas awards has identified startups who have gone on to disrupt their industries, including household names like Spotify and Deliveroo.

London-based startup Breathe Battery Technologies has raised £1.5m to scale up and accelerate the deployment of its intelligent battery management algorithms in electric vehicles and smartphones. Battery ...

At the product level, Breathe Charge and Breathe Life, replace these outdated charging strategies with adaptive solutions. Unlike traditional methods, our approach ...

London-based startup Breathe Battery Technologies has raised £1.5m to scale up and accelerate the deployment of its intelligent battery management algorithms in electric vehicles and smartphones. Battery management systems are the brains behind batteries in devices and vehicles.

Volvo Cars has partnered up with Breathe Battery Technologies (Breathe), becoming the first car company to get access to the latest version of its patented, algorithm-enabled charging software for use on our new generation fully electric cars.

Breathe Battery Technologies | 13,366 followers on LinkedIn. We make batteries better. A lot better. | Breathe is more than a battery performance company. We help you do more...

Breathe's software approach to battery optimization promises to enhance charging speed and lifespan without needing new cell chemistry or hardware changes.

Breathe's adaptive algorithms dynamically adjust charging strategies based on the battery's condition, maximising efficiency and lifespan. ? Campbell envisions a future where batteries ...

Breathe's adaptive algorithms dynamically adjust charging strategies based on the battery's condition, maximising efficiency and lifespan. ? Campbell envisions a future where batteries become software-defined
