

Bahamas caeli energie

Caeli Energie designs and manufactures cooling systems for buildings with a low environmental footprint, consuming 5 times less energy than conventional air conditioners. Here's why we support them.

CAELI Energie has unveiled a revolutionary solution that promises to cool our homes without the need for an outdoor unit or refrigerant gas, and with electricity consumption cut by a factor of 5. Imagine being able to cool your home without refrigerant gas (which is very harmful to the atmosphere), while consuming 5 times less electricity than ...

French climate startup Caeli Energie has raised EUR10m in equity and debt -- its second funding round -- to increase the production of its low-carbon air conditioners. The round was led jointly by Asterion Ventures, Starquest Capital, Bpifrance and Rise PropTech and follows a EUR2.1m pre-seed round raised at the start of 2022.
