

Virtue Solaris offers you a unique battery storage solution based on high voltage lithium ion batteries produced by renowned electronics manufacturer Huawei.

Lithium ion batteries are ideally suited for domestic solar energy storage applications, due to their compact size, modular design and scalability, high power density, long lifespan, absence of maintenance costs, high safety and relatively low cost.

Malta's Regulator for Energy and Water Services (REWS) has announced a one-year extension to its FITs for households and businesses, as well as its residential solar and battery rebate scheme.

Interconnect Malta announced that preparations are underway for Malta to have the first two large scale Battery Energy Storage Systems that store electrical energy, so that Malta can invest in more renewable energy sources in the coming years.

Un progetto rivoluzionario promette di trasformare il futuro dell'energia a Malta, aprendo la strada a una svolta ecologica senza precedenti! Si tratta della realizzazione di due colossali sistemi di accumulo energetico a batteria, destinati a immagazzinare l'energia prodotta da fonti rinnovabili per utilizzarla quando pi#249; serve ...

Having battery-stored renewable energy will also allow the country to reduce its reliance on fossil fuel-generated power at peak times, the company said, helping Malta achieve its decarbonisation...

Interconnect Malta Ltd. (ICM) has been entrusted the responsibility to implement two Battery Energy Storage Systems (BESS) to be connected to the Maltese National electric grid network. BESS is essentially a group of large batteries configured to store and dispatch electrical energy with very fast response when required.

First announced in June 2023, the project is being led by Interconnect Malta, an Energy Ministry agency responsible for energy infrastructure projects.

Malta's commitment to electricity network reinforcements and its plans to augment security of supply through new interconnections with mainland Europe and battery storage systems are paving the way for increased renewable energy investment in coming years.

Preparations are in hand for the country to have its first large battery plant that will store electric energy by means of Interconnect Malta in collaboration with Enemalta and the subsidiary company International Energy Service Centre Limited. This will be as a result of an investment of EUR47 million co-financed by the European Union.
