In a pioneering move for state-owned utilities in the Balkans, Montenegro"s largest power utility, EPCG, is planning to launch a large-scale, battery energy storage procurement exercise by the end of 2024. ... The utility has also decided to install a 5 MWh battery energy storage system alongside its proposed Kapino Polje solar power plant ...

Elektroprivreda Crne Gore, owned by the Government of Montenegro, started the preparations to install battery energy storage systems. It is a pioneering move among state-owned power companies in the Western ...

Elektroprivreda Crne Gore, owned by the Government of Montenegro, started the preparations to install battery energy storage systems. It is a pioneering move among state-owned power companies in the Western Balkans as well as in Southeastern Europe.

Elektroprivreda Crne Gore (EPCG), Montenegro"s leading electricity company, has begun preparations on the installation of 245 MWh of battery energy storage systems (BESS). This step marks an important milestone in the region"s energy evolution.

A 300MW/600MWh battery energy storage system (BESS) developed by Ørsted will be co-located with its Hornsea 3 Offshore Wind Farm onshore substation. Flow battery player Invinity claims new product can enable "solar baseload" for the grid

Montenegrin power utility Elektroprivreda Crne Gore (EPCG) will launch by the end of 2024 a project for the development of battery energy storage systems (BESS)

4 · EPCG intends to install lithium-ion batteries. The Board of Directors has adopted a project task proposal and announced the launch of a public call for a feasibility study and project design. The company plans to secure the flexibility of the power system by developing storage systems based on lithium-ion

batteries, EPCG said.

Montenegro"s largest power utility, EPCG, said it plans to develop lithium-ion battery energy storage systems at four locations in order to harness excess renewable energy production and ensure the flexibility of the power system. The goal is to use the existing infrastructure for connection to the grid.
