

Battery for loadshedding Barbados

The pilot project will focus on the use of battery energy storage systems of four-, three- and two-hour durations, with a total allocated capacity of 50 megawatts (MW)." As such, the regulator has determined for a two-hour battery up to 25 kilowatt (kW), the energy storage rate will be set at \$0.675 per kWh and \$56.78 per month.

The introduction of battery energy storage systems (BESS) facilities will greatly enhance the island's ability to integrate renewable energy into the grid, stabilise power supply, and reduce dependence on fossil fuels.

The pilot will focus on the use of battery energy storage systems of four (4), three (3) and two (2) hour durations, with a total allocated capacity of 50MW. In order to receive the Energy Storage Tariff (EST), projects must meet the "used and useful" criteria as defined in the decision.

On May 6, 2024, the Fair Trading Commission issued its Decision on the Barbados Light and Power Company Limited's (BLPC) Application for preapproval of investments and cost recovery through the clean energy transition rider.

Barbados is a step closer to launching its first procurement project for Battery Energy Storage Systems to support the grid and unlock stalled Solar PV connections. The Ministry of Energy and Business is currently hosting a three-day Procurement Design Workshop with key stakeholders to discuss and make critical decisions with regard to ...

Barbados has initiated its first procurement for battery energy storage systems in a bid to support the growing interest in renewable energy investment on the island. Last week, the island government announced that the call for request for information (RFI) for new battery storage capacity and the publication of the competitive procurement term ...

The Fair Trading Commission (the Commission) and the Chief Electrical Officer have approved the Barbados Light & Power Company Limited's (BLPC's) Interconnection Requirements for Battery Energy Storage Systems (BESS) at Voltages 24.9 kV and below.

Barbados is a step closer to launching its first procurement project for Battery Energy Storage Systems to support the grid and unlock stalled Solar PV connections. The Ministry of Energy and Business is currently hosting a three-day Procurement Design Workshop with key stakeholders to discuss and make critical decisions with regard to ...

The pilot project will focus on the use of battery energy storage systems of four-, three- and two-hour durations, with a total allocated capacity of 50 megawatts (MW)." As such, the regulator has determined for a
