Should Belgium remove fossil fuels from its energy mix?

Whilst Belgium is now able to meet over 20% of its electricity needs through wind and solar, removing fossil fuels from the mix would make the country vulnerable to periods of reduced renewable production.

Can a battery farm save energy in Belgium?

To this end, Belgium is already laying the groundwork for battery farms capable of storing surplus energy. It also has positioned itself as a pioneer of hydrogen as an alternative to liquefied natural gas (LNG) that remains critical to Europe's energy mix.

Does Belgium still produce electricity?

Whilst Belgium is making year-on-year gains in renewable electricity production, notably in wind and solar, this is still a long way to go. Coal remains key to steel production, though this site of the Cockerill blast furnace of Ougree (near Liège) is now defunct, 1972. Credit: Belga archives

Will Belgium have an electricity interconnection plan for 2030?

In relation to the internal market, Belgium will have already surpassed the electricity interconnection level for 2030, with a level of electricity interconnectivity of 21% in 2020. Nonetheless, the plan would benefit from including a concrete aim for 2030. Further concrete and quantifiable objectives could be

To this end, Belgium is already laying the groundwork for battery farms capable of storing surplus energy. It also has positioned itself as a pioneer of hydrogen as an alternative to liquefied natural gas (LNG) that remains critical to Europe's energy mix .

Belgium proposes an 18.3% share of energy from renewable sources in gross final consumption of energy in 2030 as contribution to the EU renewable energy target for 2030. This level of ambition is significantly below the share of 25% by 2030 that results from the formula in Annex II of the Governance

By leveraging advanced diagnostics, preventative maintenance, and swift corrective actions, we safeguard your energy output, investment returns, and the environment. Trust in our hands-on ...

From the start, Cleanleaf Energy will be one of the largest third-party O& M providers in the country, managing and optimizing more than 1.9 GW across 1,000 solar and energy storage projects, including utility-scale plants ...

CleanLeaf, previously known as Borrego O& M, stands at the forefront of the renewable energy sector. Our expertise lies in the operations and maintenance of both photovoltaic systems and ...
