

Why should you install solar panels in Belgium?

With enough solar panels, you will be significantly less dependent on your energy provider and are able to use completely green electricity. Solar panels can also help you with lowering your energy bills. There are two different types of solar panels in Belgium you can install: What Are Solar Thermal Panels?

How many solar panels did PV Cycle Belgium collect?

PV Cycle Belgium says it collected and processed 404 tons of solar panels for recycling during the first quarter of this year. It notes that the number of solar panels it has collected over the last five years has more than quadrupled.

Where can I install solar panels in Belgium?

For the installation of solar panels on the ground, on a protected building or in other regulated cases, you will have to contact your municipality. There are several companies active in Belgium that install solar panels.

What is a PV system in Belgium?

In Belgium, most PV systems are grid-connected distributed systems on buildings. Thanks to the declining prices of PV, some ground-mounted systems were built in 2017, but it is still a small market segment. The same happened with floating PV installations. The main off-grid systems are road signs with dynamic display.

Can solar panels be installed on Belgian electricity grids?

Synergrid, the federation of Belgian electricity and gas transmission and distribution system operators, will soon allow solar panels and household batteries with a plug and socket to be deployed on the country's electricity distribution grids.

Can solar panels be installed in Brussels?

In Brussels additional regulations are added: the solar panels can not be visible from a public space and they do not protrude more than 30cm off the roof. For the installation of solar panels on the ground, on a protected building or in other regulated cases, you will have to contact your municipality.

At Belga Solar, we offer you more than just solar panels; we provide a complete energy solution. With over 15 years of experience in the field, we are proud to be a 100% Belgian company committed to sustainability and innovation. Belga Solar is your ideal partner for a successful energy transition.

Belgium had 4,254 MW of solar power generating 3,563 GWh of electricity in 2018. [2] In 2015 PV solar power accounted for around 4% of Belgium's total electricity demand, the 4th highest penetration figure in the world, although the country is some way behind the leaders Germany, Italy and Greece at between 7% and 8% of electricity demand. [3]

Belgium pv modules

SunLion ambitions to be a European leader in solar photovoltaic module production, differentiating from low-cost imports with (1) best-in-class energy conversion efficiency, (2) Belgian and European IP, (3) better aesthetics and (4) lower carbon footprint, while ensuring high security of supply and traceability for its customers.

In partnership with a Belgian investor, we cover the installation cost of your photovoltaic panels and provide two additional options besides direct purchase:

In Belgium, most PV systems are grid-connected distributed systems on buildings. Thanks to the declining prices of PV, some ground-mounted systems were built in 2017, but it is still a small market segment. The same happened with floating PV installations. The main off-grid systems are road signs with dynamic display.
