

Who can benefit from a new off-grid solar scheme in Benin?

Households, smallholders and entrepreneurs in remote locations across Benin will be able to access reliable and cheap electricity for the first time under a new off-grid solar scheme agreed between leading solar energy company ENGIE Energy Access and the European Investment Bank, one of the world's largest financiers of renewable energy.

What is Benin's current energy situation?

This section provides information on Benin's current energy situation with energy demand-and-supply scenarios. According to the International Renewable Energy Agency (IRENA), 41% of Benin's population currently have access to electricity.

How can bioenergy contribute to the energy sector in Benin?

In addition, the Vossa hydroelectric power plant of 60.2 MW is to be built with an annual production capacity of 188.2 GWh. An additional hydroelectric plant is planned to be installed in Benin to increase the national electricity production in Benin. Bioenergy can also play a crucial role in the energy sector in Benin.

Which institutions are working to provide access to affordable energy in Benin?

Several institutional frameworks in the energy sector in Benin are working to provide access to affordable energy in the country. The ME is the biggest institution of the energy sector, responsible for the management of the energy sector and in charge of the implementation of RE projects.

What type of energy is used in Benin?

The evolution of the electrical mix of Benin indicates that, in 2020, natural gas was the first form of energy used to produce electrical energy, representing a proportion of 71.63%. Solar photovoltaic (PV) accounts for 0.30% of the mix by form of energy compared with 1.36% in 2016, as shown in Fig. 3.

Will Benin provide 100% electricity to its community by 2050?

Solar photovoltaic (PV) accounts for 0.30% of the mix by form of energy compared with 1.36% in 2016, as shown in Fig. 3. This shows that the government must make more effort to provide 100% electricity access to its community by 2050. Electricity mix of Benin from 2016 to 2020.

3E, Egnon Consulting and Socrege have been assigned by the Societe Nationale d'Electricite (SBEE) to provide owner's engineering services for Benin's first utility-scale solar power plant.

The Dohou MySol Grid is powered by 135 kW of solar panels and supported by 130 kWh of Lithium-ion batteries. It connects over 1,500 residents and businesses to sustainable energy solutions.

The idea is it should be a pilot for regulated off-grid electrification in Benin, part of a region that historically has failed to capture its huge renewable resources because of inadequate ...

Sous le haut patronage du Ministre de l'Énergie, de l'Eau et des Mines, M. Samou S&idou ADAMBI, et en présence du Directeur Général de la Société Béninoise de Production d'Électricité (SBPE), M. Emeric TOKOUDAGBA, le Bénin a franchi une étape décisive dans sa quête d'autonomie énergétique avec le lancement des travaux de construction de la ...

To provide access to clean energy services to its communities, the government of Benin has recently inaugurated a 25-MW solar PV system. The solar power plant of Illoulofin is the first solar plant integrated into the grid with ...
