

The report also ranks HyperStrong as the top BESS integrator in China (mainland) market in terms of cumulative installed and contracted project capacity in both GW and GWh, and No. 4 in the global market cumulatively. These two rankings are both based on project capacity as of end of July 2024.. HyperStrong was ranked among the top five BESS ...

New Zealand's First Utility Scale Battery Energy Storage System (BESS) Gains Traction. WEL Networks and Infratec are pleased to announce that they have entered into major contracts for the supply and build of New Zealand's largest battery storage facility.

Electric power distribution company WEL Networks and developer Infratec have launched their grid-connected battery energy storage system (BESS) in New Zealand. ...

WEL Networks and Infratec are proud to announce the launch of New Zealand's largest Battery Energy Storage System (BESS) with commissioning underway. The BESS is set to deliver huge benefits to the Waikato by providing an energy storage facility which will improve the resilience of the New Zealand electricity system, while also increasing the ...

We extend our congratulations to Infratec on the successful completion of New Zealand's first utility scale BESS. This achievement signifies a leap forward in the country's renewable energy capabilities and demonstrates Infratec's strong commitment to advancing sustainable practices.

Simplifying BESS deployments by mastering their associated risks. With the introduction of Battery Energy Storage Systems "BESS", a new role has been created on the value chain. It is the role of a BESS integrator. The role of an integrator can be misunderstood at times or blended with other roles at other times.

September 27, 2024: Saft, a subsidiary of French oil giant TotalEnergies, has won a 100MW/200MWh contract to deliver a turnkey, utility-scale BESS for Genesis Energy, a listed New Zealand generation, wholesale, and retail energy company.

Hyperstrong, the largest BESS system integrator in China, is targeting the US energy storage market after becoming one of the largest providers globally. The company, full name Beijing HyperStrong Technology, grew substantially over 2019-2022 to become the largest system integrator in China, it claims, and one of the top five in the world by ...

A new report has found the widespread uptake of distributed battery energy storage systems (BESS) in New Zealand could play an important role in supporting the power system as solar PV and electric vehicles are increasingly adopted.

We extend our congratulations to Infratec on the successful completion of New Zealand's first utility scale BESS. This achievement signifies a leap forward in the country's ...

The Glenbrook Battery Energy Storage System (BESS) project is tackling Aotearoa New Zealand's electricity capacity and supply quality challenges in South Auckland. By boosting renewable energy flexibility, it will deliver reliable electricity to thousands of homes, enhancing the stability of the power grid while also reducing the region's ...

Construction of Contact Energy's 100-megawatt / 200-megawatt hour Battery Energy Storage System (BESS) is a key milestone in New Zealand's transition to more sustainable and resilient energy sources. As one of the largest in the country, the Glenbrook facility will make a significant contribution to New Zealand's national grid, with the ...

Construction will commence in New Zealand on the country's biggest battery energy storage system (BESS) project so far in July this year, with the 35MW system expected to be commissioned in December.

In addition, many BESS integrators have been seeking to enhance the vertical integration of their supply chain," Shang says. BESS integrators are usually responsible for procuring individual components, assembling the system, providing a wrap on warranties, integrating the controls and energy management system, and often providing project ...

The Glenbrook Battery Energy Storage System (BESS) project is tackling Aotearoa New Zealand's electricity capacity and supply quality challenges in South Auckland. By boosting ...

Looking ahead, Jansen noted that an influx of new market entrants is increasing competition among system integrators. One way new participants that might come from the battery or inverter manufacturing space ...

Electric power distribution company WEL Networks and developer Infratec have launched their grid-connected battery energy storage system (BESS) in New Zealand. The two companies said last Friday (20 October) that their 35MW/35MWh project, in the Waikato region of New Zealand's Upper North Island, has entered the commissioning phase.

We have led the concept and front-end engineering design (FEED) phases, and are now working with Contact Energy on detailed design and construction support. What ...

Having developed and built the largest BESS in New Zealand at Rotohiko, Infratec's expertise makes us the perfect partner for accessing BESS concept design and commercial feasibility right through to installation, commissioning, grid integration and ongoing operation support

Storage System (BESS) with commissioning underway. The BESS is set to deliver huge benefits to the Waikato by providing an ...

We have led the concept and front-end engineering design (FEED) phases, and are now working with Contact Energy on detailed design and construction support. What sets us apart is our ability to leverage global experience in BESS technology and tailor them to the unique challenges of the New Zealand market.

Having developed and built the largest BESS in New Zealand at Rotohiko, Infratec's expertise makes us the perfect partner for accessing BESS concept design and commercial feasibility ...

HyperStrong Achieves Recognition in Energy Storage Industry. HyperStrong, a prominent player in the energy storage sector, has made headlines by securing a position among the top three battery energy storage system (BESS) integrators globally, as reported in the 2024 Battery Energy Storage System Integrator report released by S& P Global Commodity Insights.

The increasing level of investment in BESS has prompted competition between all major integrators seeking to capitalize on the opportunity to expand market share and capitalize on demand. This has resulted in pricing reductions from all major BESS system integrators.<sup>2</sup> With the reduction in costs, BESS project operators

A new report has found the widespread uptake of distributed battery energy storage systems (BESS) in New Zealand could play an important role in supporting the power ...
