Does Bulgaria have a good energy sector?

Bulgaria's energy sector is at a critical juncture, with two main objectives shaping its direction: decarbonization and reducing reliance on Russian energy. Over the past year, Bulgaria has made considerable progress in expanding its renewable energy capacity, particularly in solar power.

The best year in the history of Bulgarian energy was 2022, during which a war erupted in Europe, the supply of Russian gas was halted, and the prices of energy products skyrocketed. Companies' revenues in the top 30 of the sector doubled again (after a similar jump in 2021) and reached an incredible 51 billion levs.
