

Botswana solar container end plate manufacturing

Will a 100 MW solar plant be built in Botswana?

State-owned Botswana Power Corp. has signed a power purchase agreement with a consortium of Chinese enterprises and other companies to construct a 100 MW solar plant in southern Botswana. The project is expected to start generation by the end of 2025.

How will Scatec power plant work in Botswana?

The power plant is Scatec's first in Botswana and will generate predictable revenues from a 25-year power purchase agreement(PPA) with Botswana Power Corporation,the national utility. The remaining 60 MW of the project is currently under construction and is expected to be completed in the beginning of 2026.

How will a solar power plant benefit Botswana?

The solar power plant will ensure that approximately 48,000 tons of CO 2 emissions will be avoided and power approximately 20,000 households annually. Botswana is rich in natural resources and has vast solar energy potential, receiving over 3,200 hours of sunshine per year.

Where will Scatec power plants be built?

Construction and operation of the power plants will be managed by Scatec's organisation in South Africa. "As we reach another milestone in our renewable energy journey in Botswana,we are now looking forward to starting construction of the largest solar project in the country.

How will Botswana Power Projects be implemented?

These projects,with a combined capacity of 1.5GW,will be implemented through private sector investment,with the Botswana Power Corporation (BPC) acting as the offtaker under long-term Power Purchase Agreements (PPAs) of up to 25 years.

How long will Botswana Power Plant last?

The deal involves an engineering,procurement and construction contract,with operation and maintenance of the power plant for 25 years. The facility is expected to start generation by the end of 2025. Botswana 's President,Mokgweetsi Masisi,said the project is a key milestone in the country's energy transition.
