

# Brockwell solar and storage Trinidad and Tobago

Who is Brockwell storage & solar?

The Brockwell Storage & Solar team is highly experienced and passionate about building the clean energy infrastructure needed for a net zero future.

Where is Brockwell based?

Brockwell's initial portfolio of projects was based in Scotland, in and around the coalfield areas, but has now been broadened to a UK nationwide portfolio. Brockwell's strategy is to carefully select project development and investment opportunities across a range of technologies.

What is Brockwell's strategy?

Brockwell's strategy is to carefully select project development and investment opportunities across a range of technologies. We have expertise and understanding of the energy markets with the skills to develop, construct and operate energy projects.

Solar Energy Caribbean is a professional installation company providing solar and EV charging solutions in Trinidad & Tobago T& T. Offering Solar Panels, Battery Storage, Grid-Tied/Off-Grid systems, and EV chargers for Residential and Commercial properties, including homes, hotels, resorts, villas, factories, warehouses, and agricultural sites.

Brockwell Storage & Solar is developing a portfolio of subsidy free solar projects in the UK. The sites are focused in the south-east to maximise energy yield and have been chosen to minimise grid connection costs by ensuring they are in close proximity to connection points.

The East Park development would see a ground-mounted solar photovoltaic generating station with a 400MW capacity and a 100MW battery energy storage system (BESS). The development will include an on-site substation and connect via an underground cable to the existing electricity transmission network at National Grid's Eaton Socol substation.

List of Trinidadian solar panel installers - showing companies in Trinidad and Tobago that undertake solar panel installation, including rooftop and standalone solar systems.

Origination and development of BESS and solar projects across the UK. Site finding; Land agreements; Planning and consenting; Initial financial viability, modelling and analysis; Initial grid connection applications and security; Local community & stakeholder support.
