

Is Burkina Faso suitable for solar power projects?

This suitability assessment was carried out at the request of the Government of Burkina Faso to map potential areas for utility-scale solar photovoltaic (PV) and wind projects. Currently, less than 25% of the population has access to electricity and the majority of those with access live in urban areas.

Why is Burkina Faso launching a solar power plant in Komsilga?

Loading... In a significant step towards enhancing electricity supply and sustainable development, Burkina Faso signs an agreement for a 50 MWp solar power plant in Komsilga. The initiative, led by the Minister of Energy and Energie Plus, aims to fortify renewable energy contributions, fostering economic growth and improved access to electricity.

Will a 50 MWp solar power plant bolster Burkina Faso's electricity supply strategy?

In a pivotal move to bolster Burkina Faso's electricity supply strategy, the Minister of Energy, Mines, and Quarries, Simon-Pierre BOUSSIM, and Serge CONSEIGA, General Director of Energie Plus, sealed an agreement for the construction of a 50-megawatt peak (50 MWp) solar power plant in the commune of Komsilga, Burkina Faso.

Can Burkina Faso achieve 95% electricity access?

The country aims to reach 95% electricity access, with 50% in rural areas and universal access to clean cooking solutions in urban areas, with 65% in rural areas by 2030, up from 9% in 2020. The utilisation of Burkina Faso's renewable resource potential would enable the country to reduce its heavy reliance on thermal generation and energy imports.

How will Burkina Faso improve electricity trade with neighbouring countries?

Additionally, the results from this report are intended to inform the design and development of the country's regional projects as Burkina Faso is planning to enhance electricity trade with neighbouring countries through regional interconnectors with Benin, Niger, Nigeria and Togo.

What is Burkina Faso's road network?

The road network considered in this analysis was provided by the National Observatory of Territorial Economy office in Burkina Faso. It includes the national, regional and departmental roads across the country as shown in Figure 6. Figure 6. Burkina Faso's road network

Due to falling hardware costs, the rise of digital technologies and the adoption of private-sector business model, solar-battery minigrids can now be a competitive option to provide electricity to off-grid areas in Burkina Faso.

The Dedougou solar project, one of the first independent power producers in Burkina Faso, is backed by a

25-year power purchase agreement with the national power company Sonabel. This project is expected to improve Burkina Faso's energy security, diversify its energy mix, increase national electrification rates, and reduce electricity costs.

The findings of this study indicate that a portion of Burkina Faso's land area is suitable for solar PV and wind development. It suggests a maximum development potential of approximately 95.9 and 1.96 gigawatts (GW) for solar PV and wind projects, respectively, taking into consideration an installation density of 50 megawatts (MW)

The number of residential solar panel installations in Burkina Faso is not precisely documented. However, by the end of 2021, Burkina Faso had about 62 MW of installed solar capacity, with ongoing efforts to expand this further through various projects funded by international organizations like the World Bank.

Last Update 30 Jun ... 30 Jun 2024 Update Above Information ENF Solar is a definitive directory of solar companies and products. Information is checked, categorised and connected. ENF Recycling ...

The aim is to increase access to clean energy by improving the financial viability of, and promoting large-scale commercial investment in, solar photovoltaic minigrids in Burkina Faso. The project will also support the government's ...

December saw the commissioning of three different solar farms in Burkina Faso, with national electricity utility SONABEL as sole offtaker. The first two were earmarked to be officially inaugurated on 16 December, namely the Kodeni solar PV power plant in the region of Hauts Basins and the Pâ solar PV power plant in the region of the Mouhoun loop.

This renewables readiness assessment (RRA) for Burkina Faso presents key recommendations to accelerate the country's energy transition, with a view to securing a sustainable, affordable energy supply, increasing rural energy access, diversifying the economy and addressing climate change.

This renewables readiness assessment (RRA) for Burkina Faso presents key recommendations to accelerate the country's energy transition, with a view to securing a sustainable, affordable energy supply, increasing rural ...
