

China-africa economic development zone solar container

Does Africa Import solar panels from China?

This report presents Ember's analysis of Africa's imports of solar panels from China. The Chinese solar panel export data gives valuable insights because it includes imports up to June 2025, at a monthly granularity, and for every country in the world. The data can be found in Ember's China Solar Export Explorer.

Does China contribute to Africa's Economic Development?

In 2019, for example, Chinese contractors accounted for about 60% of the total value of construction work in Africa. Some of the infrastructure financed by China has done little to improve trade or economic development in Africa.

Has China built a solar power plant in Africa?

Yes, China has made strides in building solar power plants in Africa. For example, China's government financed the construction of a utility-scale 50 megawatt (MW) solar plant in Kenya-- the first of its kind in the country.

Can China fill sub-Saharan Africa's energy gap?

Closing sub-Saharan Africa's massive energy access gap will require substantial investments; around \$20 billion per year through 2030. China could play a key role in filling this need.

How does China Finance power plants in Africa?

In the past, the bulk of Chinese financing had been driven by the backing of China's two policy banks - the Export-Import Bank of China (EXIM) and the China Development Bank (CDB) - and directed particularly towards coal-fired power plants. The two banks had issued \$182bn in loans across Africa, primarily into the energy sector.

Does China have an Africa Solar Belt?

China's first major program under its new strategy of shifting overseas renewable energy investments toward smaller-scale initiatives is the Africa Solar Belt.
