

Corvus energy bergen South Georgia and South Sandwich Islands

Is Corvus Energy ready for mass-produced hydrogen fuel cell systems?

Credit: Corvus Energy. Corvus Energy has announced that it is ready to commence the development and production of large scale maritime-certified hydrogen fuel cell systems. The company stated that as a key partner, Toyota will supply the mass-produced fuel cell technology and production will take place in Norway's Bergen.

What types of energy systems does Corvus Energy offer?

Corvus Energy offers a full portfolio of energy storage and fuel cell systems, suitable for almost every vessel type, providing power systems in the form of modular lithium-ion battery systems and Hydrogen PEM fuel cell systems. Corvus Energy has unsurpassed experience from more than 1000 projects.

Where is Corvus Energy located?

The head office was moved to Norway in 2018. Corvus Energy offers Energy Storage Systems (ESS) suitable for various vessel types, providing energy storage in the form of modular lithium-ion battery systems. The battery systems provide power to hybrid and all-electric heavy industrial equipment, including large marine propulsion drives.

Where are Corvus fuel cells made?

In addition, Corvus Energy develops maritime fuel cells in partnership with Toyota. Corvus Energy has manufacturing and engineering in Porsgrunn, in Bergen, Norway, and in Richmond, British Columbia. In January 2023, Corvus opened a maritime battery manufacturing plant in Fairhaven, Washington.

What is Corvus Energy ESS?

Corvus Energy offers a full portfolio of ESS suitable for almost every vessel type, providing high power energy storage in the form of modular lithium ion battery systems. The purpose-built, field-proven battery systems provide sustained power to hybrid and all-electric heavy industrial equipment, including large marine propulsion drives.

Will Corvus build a battery factory in Bergen?

The battery factory in Bergen will supply Corvus' largest market--the growing European market--and contribute to employment in Bergen and across Northern Europe. Built on time and on budget, the factory comprises a robotized and digitized production line with nine robotic stations and a capacity of up to 400 megawatt hours (MWh) per year.

The battery factory in Bergen will supply Corvus' largest market--the growing European market--and contribute to employment in Bergen and across Northern Europe. Built ...

Corvus energy bergen South Georgia and South Sandwich Islands

We believe the combination of clean fuel and fuel cells together with batteries is the solution to reach the goal of zero emissions by 2050 for the marine industry. Together with partner Toyota, Corvus Energy developed a sustainable, large-scale maritime-certified hydrogen fuel cell system.

5 · Milestone Achieved-- Over 10 Million Tons of CO2 emissions reduced by Corvus Energy marine battery systems. Bergen, Norway November 7th 2024 -- Corvus Energy, the leading supplier of zero-emission solutions for the maritime industry is proud to...

A Norwegian-Canadian designer and manufacturer of energy storage solutions for marine propulsion Corvus Energy has launched its second battery manufacturing facility in Bergen, Norway. Equipped with a digitised production line with nine robotic stations, the automated factory's capacity reaches up to 400 MW/h a year.

The battery factory in Bergen will supply Corvus" largest market--the growing European market--and contribute to employment in Bergen and across Northern Europe. Built on time and on budget, the factory comprises a robotized and digitized production line with nine robotic stations and a capacity of up to 400 megawatt hours (MWh) per year.
