Welcome to your new Moixa Smart Battery. This is your user manual. Moixa leads the world in smart battery technology, with our all-in-one battery and inverter system, suitable for any home. Now you can take back control of your energy use, protect yourself from price rises, and save ...

The new "family-sized" smart battery, which will be showcased at Solar & Storage Live next week, is the company's largest following its 2kWh and 3kWh systems, and is intended to reflect the emerging energy tariffs that are becoming more readily available across the domestic retail supply market.

New Moixa battery fitted. The engineer who fitted my replacement Moixa solar battery was outstanding. He turned up on time, worked efficiently, tidily and cleaned up really well at the end. He checked that everything was working correctly, explained how it all worked and what to do if any problems arose.

Overview Previous products History Moixa Smart Battery GridShare Software Awards The USBCell is a rechargeable battery-powered by a USB connection to any applicable device. Launched in 2006, the USBCell has been sold in over 50 countries. It can charge to 90% in 5 hours and contains a 1.2V 1300mAh battery. It can also be charged in standard rechargeable NiMH chargers alongside standard rechargeable batteries. The USBCell is no longer for sale.

A few years ago, I took part in a local trial to install a solar battery in our home. The battery was excellent - and made a reasonable difference for our energy use. Sadly, last year, it died. It was prototype hardware, and these things happen. Moixa offered to replace it with an updated model [...]

The 4.8kWh Moixa Smart Battery has the battery modules, inverter and Moixa Hub fully contained within a beautifully designed case. The new 7.2kWh or 9.6kWh Battery Systems are individual components, allowing for additional capacity to be added in future*.

Founded in 2010, the company offers a patented Smart Solar Battery system, which combines solar power and in-house battery storage technology. This works alongside artificial intelligence enabled GridShare Software platform - both technologies the company believes can disrupt the energy sector.

The Moixa Smart Battery will store energy generated by your solar pv panels instead of it being sent back to the grid. That way it can power your home in the evening when the sun goes down.
