

Discover the asecos ION-LINE lithium cabinets for the safe storage and charging of lithium-ion batteries in a fire-protected environment. The ION-LINE cabinet models are specifically designed to meet the highest safety standards. They offer certified fire protection with a 90-minute fire resistance rating from the inside out and outside in.

Safety storage cabinets for passive or active storage of lithium-ion batteries according to EN 14470-1 and EN 1363-1 with a fire resistance of 90 minutes (type 90) -- fire protection from the outside-in and from the inside-out.

Safety storage cabinets for passive storage of lithium-ion batteries according to EN 14470-1 and EN 1363-1 with a fire resistance of 90 minutes (type 90) - fire protection from the outside-in. In addition, all models of the ION-LINE offer fire resistance for more than 90 minutes when exposed to fire from the inside-out .

Storage cabinet for undamaged lithium-ion batteries (passive storage) We recommend that SafeStore and SmartStore cabinets are delivered to the place of use as part of the safety concept. We strongly recommend that the cabinets are sited at ground floor-level so that evacuation of the whole cabinet can take place quickly in the event of an incident.

Asecos safety storage cabinets are specifically designed to house lithium-ION batteries by providing a minimum of 90-minute protection against any fire or explosion, either external to or internal to the cabinet.

When configuring a safety cabinet, please adhere to the applicable national rules and regulations for the storage of hazardous substances. If you are unsure, the asecos experts will be happy to help you further.
