Dry Cabinets from Totech Europe protect your electronic components, PCBs, and other moisture-sensitive semi-manufactured products against defects caused by humidity. Our mission is to develop controlled storage solutions that minimize component failures, reduce component waste, and optimize component quality.

McDry Electronic Drying Storage Cases provide low humidity storage without the use of nitrogen. Humidity is removed from the cabinets by use of a powerful zeolite desiccant. The desiccant is automatically recycled with a heating mechanism thus optimizing its absorption capability and does not require replacement.

Our cabinets are used in a wide variety of applications involving moisture removal and dry storage. The main industry sector installing Mekko's dry storage cabinets and drying cabinets is the electronics assembly industry, where components and substrates must be protected from the damaging effects of moisture.

Invest in our electronic humidity control dry cabinets today and experience the peace of mind that comes with knowing your electronics are safe and secure. What is an electric dry box? An electric dry box is a type of storage cabinet case that uses a heating and dehumidifying system to keep items inside a low-humidity environment.

Dry cabinets for electronic components are ideal for storing and drying ICs before placement. Our range includes QDB nitrogen dry cabinets, which regulate the flow of dry air into the storage area, and X2B oxygen dry cabinets, designed to maintain stable conditions at ...
