Is biomass a good energy source in El Salvador?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. El Salvador: How much of the country's energy comes from nuclear power? Nuclear energy - alongside renewables - is a low-carbon energy source.

What is El Salvador's 2020-2050 energy plan?

El Salvador submitted an updated Nationally Determined Contributions document in January 2022 in which they set a 640 Kt CO₂eq yearly reduction from fossil fuel burning activities by 2030 (compared to the 2019 business as usual scenario). CNE (Consejo Nacional de Energía) is responsible for El Salvador's 2020-2050 energy plan.

How does electricity work in El Salvador?

From there, the gas powers 19 internal combustion engines and waste heat feeds one steam turbine. Two 230-kV electric transmission lines, one of which connects to the Central American Electrical Interconnection System, provides added grid reliability to the region and opens further opportunities for renewable energy in El Salvador.

How will EDP help El Salvador meet its climate goals?

In addition to meeting nearly one-third of El Salvador's energy demand, EDP is projected to help the country meet its climate goals by reducing carbon emissions by 600,000 tons annually. The project has also been a catalyst for job creation and growth in the country.

Who is Cairn Energy?

Cairn Energy PLC is an independent, UK-based oil and gas exploration, development and production company. Cairn holds a balanced portfolio of exploration, development and production assets with interests in the UK and Norway and along the Atlantic Margin including Senegal, Mexico and the Republic of Ireland.

When did El Salvador's EDP power plant start operating?

Despite the enormous challenges, including supply-chain disruptions, travel restrictions, airport closures, global financial volatility, and Salvadoran COVID-19 mitigation measures and regulations, the power plant began commercial operation in October 2022. EDP is a transformative investment in El Salvador's clean energy future.

By shifting a significant amount of power supply to natural gas, EDP reduces El Salvador's reliance on diesel and heavy fuel oil-fired power generation, offsetting 600,000 tons of carbon ...
