

Enphase energy europe Niue

How will Enphase expand in the European region?

Such capability will allow Enphase to expand in the European region more effectively amid the rising interest of homeowners to switch to solar-based energy as energy prices continue to soar in the region. Enphase introduced IQ8 Microinverters in France and the Netherlands in the second half of 2022 to capitalize on the growing solar demand.

What makes Enphase a great company?

Enphase is putting people and their power at the center of our shared energy future. Our company values show up in how we work together, how we perform, and how we all get rewarded. We listen to our customers and measure our success based on their feedback. We take action to deliver the best customer experience.

Who is Enphase solar?

Are you from the United States? Click ["Next"](#) to see content for your region. Founded in 2006, Enphase transformed the solar industry with our revolutionary microinverter technology, which turns sunlight into a safe, reliable, resilient, and scalable source of energy to power our lives.

What is the Enphase Energy System?

The Enphase Energy System helps people make, use, save, and sell their own power. This includes our industry-leading app, which provides unprecedented data and control in the palm of your hand.

How many microinverters have Enphase installed?

We have installed more than 52 million microinverters on over 2.7 million homes in over 145 countries, helping millions of people gain access to clean, affordable, and reliable energy while creating good jobs and a more carbon-free future for everyone. Enphase is putting people and their power at the center of our shared energy future.

Are Enphase solar panels a good idea?

Today, if you see a home with solar panels on it, there's a good chance it's an Enphase home. We have installed more than 52 million microinverters on over 2.7 million homes in over 145 countries, helping millions of people gain access to clean, affordable, and reliable energy while creating good jobs and a more carbon-free future for everyone.
