

The University of Eswatini UNESWA's Centre for Sustainable Energy CSER has completed the rollout of the first cohort of the Capacity Building Certificate Program on Minigrids Development. In an interview just after the completion of the last module for the first cohort, the coordinator for the training program Professor Simiso Mkhonta from ...

The first phase will build upon the already developed 35-kW Solar PV system which currently supplies power to 21 homes and two churches by integrating a productive use of energy (PEU) component on the demand ...

The Africa Minigrids Program (AMP) is a Country-led technical assistance program for minigrids. It is comprised of country-level interventions in an initial 21 countries in Africa and complemented by a "regional platform" acting as the ...

Eswatini has launched tender for development of a solar minigrid project. The project aims to electrify the Bulimeni community, which comprises 92 households in the ...

Eswatini has launched a tender to develop a solar minigrid project to electrify the Bulimeni community, which includes 92 households in the Shiselweni region of southern Eswatini. The tender invites private minigrid ...

The acting Minister for Natural Resources and Energy, Hon. Jabulani Mabuza, launched the Africa Minigrids Program (AMP) which will enable about 500 emaSwati to access clean and affordable energy. Half of the beneficiaries from two rural communities - Bulimeni in the Shiselweni Region and Mvundla in the Manzini Region - are women.

The University of Eswatini UNESWA's Centre for Sustainable Energy CSER has completed the rollout of the first cohort of the Capacity Building Certificate Program on ...

The first phase will build upon the already developed 35-kW Solar PV system which currently supplies power to 21 homes and two churches by integrating a productive use of energy (PEU) component on the demand side. In its second phase, the AMP will develop an energy hub for community-based small businesses like grocery shops and salons.

Eswatini has launched a tender to develop a solar minigrid project to electrify the Bulimeni community, which includes 92 households in the Shiselweni region of southern Eswatini. The tender invites private minigrid developers to design, construct, operate, and maintain the Bulimeni Solar PV-Battery minigrid project for a 20-year operation period.

4 &#0183; The meetings took place in Mvundla and Bulimeni, communities where AMP Eswatini's first pilot

Eswatini has launched tender for development of a solar minigrid project. The project aims to electrify the Bulimeni community, which comprises 92 households in the Shiselweni region of southern Eswatini.

The acting Minister for Natural Resources and Energy, Hon. Jabulani Mabuza, launched the Africa Minigrids Program (AMP) which will enable about 500 emaSwati to access clean and affordable energy. Half of the beneficiaries ...

renewable energy while addressing global challenges such as climate change, energy security, and economic resilience. In the context of evolving energy landscapes, embedded solar generation emerges as a key component of future-ready power systems. By integrating solar power generation directly into homes, businesses, and industrial operations,

The Eswatini Energy Regulatory Authority (ESERA) invites expressions of interest from private developers for the Bulimeni Solar PV-Battery Mini-Grids Project. This initiative, part of the Africa Minigrids Program (AMP), aims to enhance clean energy access in Eswatini's remote Bulimeni community.

The Africa Minigrids Program (AMP) is a Country-led technical assistance program for minigrids. It is comprised of country-level interventions in an initial 21 countries in Africa and complemented by a "regional platform" acting as the advocacy, coordination and knowledge management hub for ...
