According to a report by specialist waste news website ENDS Waste & Biodiversity, its owner Evero Energy is looking for a buyer after struggling to process enough waste to make it economically viable.

Evero confirmed that its two BECCS (Bio Energy with Carbon Capture and Storage) projects have both passed the "deliverability assessment" in the UK Government's Hynet Track 1 expansion process. This lays the foundation for the delivery of two world class, large volume Greenhouse Gas Removals facilities operational by 2030.

Evero mothballs Hull waste-gasification plant as sale considered. Gasification-equipped facility has struggled to process waste at the volume needed to make it economically viable and it has stopped operating, EWB can report

Evero Energy Group Limited, a leading low-carbon waste-to-energy company, has announced that it will be partnering with Mitsubishi Heavy Industries, Ltd., one of the world's leading industrial groups, to deliver its InBECCS (Ince Bioenergy with Carbon Capture and Storage) project.

Renewable energy company Evero has announced its two CCS projects have both passed the "deliverability assessment" in the UK Government's Hynet Track 1 expansion process. This lays the foundation for the delivery of two large-volume Greenhouse Gas Removals (GGR) facilities operational by 2030.
