Is Gibraltar switching from diesel to natural gas?

Gibraltar today saw the official opening of a liquefied natural gas (LNG) regasification terminal that was recently completed by Shell and Gasnor (a 100% Shell-owned subsidiary). As a result, Gibraltar is switching from diesel-fuelled power generation to cleaner-burning natural gas, using a newly commissioned 80-megawatt gas-fired power plant.

Why does Gibraltar need a new power plant?

This secures Gibraltar's energy supply economically, environmentally and sustainably. The associated closure of the three old plants represents the largest measure taken to improve air quality and reduce greenhouse gas emissions. The new power plant consists of six engines; 3 of which run on natural gas and 3 of which are dual fuel.

How many power stations are there in Gibraltar?

There are currently three installations in Gibraltar producing energy. Two of these installations namely Waterport and OESCO power stations supply electricity to the civil population,...

Why does Gibraltar need a LNG power system?

The people and businesses of Gibraltar will have better air quality, a quieter environment, and see the rewards of better energy efficiency. Michael Caetano, Chief Operational Officer of the Gibraltar Electricity Authority (GEA) When Gibraltar upgraded its nearly 40-year-old power system, they opted for a unique LNG solution.

Does Gibraltar need a cleaner liquefied natural gas (LNG)?

Until recently, Gibraltar's energy needs were 100% powered by marine diesel - so, a better solution was urgently needed- one that switches from diesel to cleaner liquefied natural gas (LNG).

Gibraltar today saw the official opening of a liquefied natural gas (LNG) regasification terminal that was recently completed by Shell and Gasnor (a 100% Shell-owned subsidiary). As a result, Gibraltar is switching from diesel-fuelled power generation to cleaner-burning natural gas, using a newly commissioned 80-megawatt gas-fired power plant.

Based on our mantra of Managing Energy, Synergy Power Systems strives to meet clients' needs through high quality products, competitive prices and by maintaining a customer-centered approach that places the client at the focus of everything we do.

Through Synergy Power Systems Ltd based in Kenya, Det-Tronics has been providing proven flame detection, gas detection and hazard mitigation systems for high-risk processes and critical industrial operations. Det-Tronics designs, manufactures and commissions certified SIL 2-capable flame and gas detection solutions.
