Whether it is nuclear power, hydropower, or thermal power, they all require a certain amount of cooling water, which is necessary during the power generation process. However, solar energy does not have such a limitation. Solar energy equipment can be installed in all areas where water is scarce to generate electricity.

Greenland will vigorously invest in Power Generation, Transmission and Distribution Systems. We will deploy resources in the development of independent Power Generation Plants, hybrid power generation and distribution - as encapsulated for example under the Illuminate Nigeria Project
