

When is navigating uncharted waters & grid interconnections in Curacao?

Michael Ginsberg will present Navigating uncharted waters: Grid interconnections in Curacao during the session dedicated to Island Power: Renewables for Diesel-Powered Utilities on Oct. 14, 2021, 8-10 a.m. MDT. This year's conference, Powering the New Energy World, includes six separate online sessions over three days.

Why does Curacao face energy security issues?

Curacao faces energy security issues not only due to its reliance on imported fuels but also because of the age of its generation infrastructure. Thirty megawatts (MW) of Aqualectra's generation portfolio is beyond its expected service life and the surplus power from the RdK refinery is subject to frequent outages.

What is Curacao's energy policy?

In 2009, Curacao developed an energy policy document, which sets out general guidance and governing principles for further study of energy issues.⁴ It suggests the goal of reducing energy consumption by 40% by 2020 and encourages the investigation of combining wind power with storage to provide 100% of the island's energy needs.

Why does Curacao use wind energy?

Curacao's long history with wind energy has provided it with valuable experience in integrating variable energy resources into the electrical system while also demonstrating the value of avoiding petroleum-based electricity generation.

How much does energy cost in Curacao?

Energy Snapshot Curacao This profile provides a snapshot of the energy landscape of Curacao, an autonomous member of the Kingdom of the Netherlands located on the coast of Venezuela. Curacao's utility rates are approximately \$0.26 per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33/kWh.

Why is the feed-in tariff unsustainable in Curaçao?

In Curaçao, the feed-in tariff was generous but poorly designed and unsustainable due to the lack of investment in energy storage, distribution transformers and other infrastructure needed to support high penetrations of variable renewable energy. Know who manages renewable energy policy at the utility.

Curacao faces energy security issues not only due to its reliance on imported fuels but also because of the age of its generation infrastructure. Thirty megawatts (MW) of Aqualectra's generation portfolio is beyond its expected service life and the surplus power from the RdK refinery is Population 146,836 Total Area 444 sq. km

In the Caribbean, the island of Curaçao has issued a request for proposal for an advanced metering infrastructure (AMI) system. Aqualectra, the Curaçao Water and Power ...

Technology group Wärtsilä; has again been contracted by Aqualectra, Curaçao's government owned utilities company, to provide Engineering, Procurement and Construction in support of the country's decarbonisation programme.

The story in Curacao portrays the universal challenges that accompany integrating high amounts of variable renewable energy into a centralized electric grid designed for constant power supply. The conflicting ...

Over the next three years, Aqualectra is embarking on transformative projects to enhance energy stability, expand the grid, and increase the use of renewable energy. ...

For Curaçao and most Caribbean islands, infrastructure improvement and advancement are an essential step towards greater economic well-being, sustainability, and prosperity, but ensuring the completion of infrastructure investment projects, including the due diligence and financing, is not an easy task.

In the Caribbean, the island of Curaçao has issued a request for proposal for an advanced metering infrastructure (AMI) system. Aqualectra, the Curaçao Water and Power Company, is seeking requests from experienced and specialized firms in AMI, and smart grid technologies and applications to provide an advanced electricity and water metering ...

Over the next three years, Aqualectra is embarking on transformative projects to enhance energy stability, expand the grid, and increase the use of renewable energy. Notable initiatives include:

Technology group, Wärtsilä;, will supply the Caribbean island of Curaçao with a 25 MW/25 MWh battery energy storage system (BESS). The system will enable the expansion of renewable energy capacity and the reduction of carbon emissions, representing an important step towards a sustainable energy future for the island.

The story in Curacao portrays the universal challenges that accompany integrating high amounts of variable renewable energy into a centralized electric grid designed for constant power supply. The conflicting priorities that swirl around renewable energy are common as utilities struggle to balance the erosion of revenues and potential increased ...

AMU reconstructed the HV- distribution grid by carrying out electrical and civil works and realization of Fiber Optic communication for two container cranes. AMU utilizes the vast knowledge and expertise of its sister company to assist our costumers

For Curaçao and most Caribbean islands, infrastructure improvement and advancement are an essential step towards greater economic well-being, sustainability, and prosperity, but ensuring the completion of ...
