

Croatia, a Mediterranean country with a diverse energy portfolio, is embracing the potential of grid-scale/utility-scale energy storage systems (ESS). In this article, we will delve into the current state of the ESS industry in Croatia, highlight new projects under construction, explore the major drivers propelling this growth, and offer an ...

The European Commission has allocated EUR19.8 million in the form of state aid for a number of projects for grid-scale energy storage. The subsidy was awarded to the company IE-Energy from Rijeka. This amount will cover about 30 percent of the costs for the series of battery systems planned for construction around the city of Sibenik.

Central and Eastern Europe (CEE)-based developer and independent power producer (IPP) Woodburn Capital is deploying a co-located battery storage project in Croatia, with final regulations around connecting ...

In a significant stride towards energy modernisation, Croatia is setting aside EUR 500 million for the development of large-scale energy storage systems. The announcement was made by Damir Habijan, Croatia's Minister of Economy and Sustainable Development, at the seventh international energy conference hosted by Jadranski Naftovod (JANAF ...

Central and Eastern Europe (CEE)-based developer and independent power producer (IPP) Woodburn Capital is deploying a co-located battery storage project in Croatia, with final regulations around connecting batteries to the grid expected imminently.

Energy storage is one of the "hot" topics in Croatia in recent years, however, currently there are no active energy storage facilities on a bigger scale. As of January 2023, there has been only one energy approval issued for the energy storage facility with capacity of 50 MW.

Croatia is preparing to build Eastern Europe's largest energy storage project. IE Energy has secured EUR19.8 million (\$20.9 million) to develop a 50 MW storage system, potentially...

The European Commission has approved EUR19.8 million (US\$20.1 million) in state aid from the government of Croatia to energy storage operator IE-Energy for a series of grid-connected projects. The aid will be a ...

Croatia got the green light from Brussels to give a EUR 19.8 million grant to a domestic startup for a massive energy storage project. IE-Energy is planning to build a battery system of 50 MW, which means it would be the biggest in Southeastern Europe. The European Commission has approved, under the European Union's aid

rules, a EUR 19.8 ...

Croatia got the green light from Brussels to give a EUR 19.8 million grant to a domestic startup for a massive energy storage project. IE-Energy is planning to build a battery system of 50 MW, which means it would ...

The European Commission has approved EUR19.8 million (US\$20.1 million) in state aid from the government of Croatia to energy storage operator IE-Energy for a series of grid-connected projects. The aid will be a direct grant to IE-Energy and will cover approximately 30% of capital expenditures for a series of grid-scale battery energy storage ...

The European Commission has approved, under EU State aid rules, a EUR19.8 million (\$19.7 million) Croatian aid measure aiming to help with the procurement and installation of grid-scale batteries to provide transmission system operators (TSOs) with balancing services.

ATESS has made substantial strides in supporting Croatia's industrial sector with cutting-edge energy storage solutions. By implementing energy storage systems across four diverse factories, ATESS is addressing key challenges and aligning with Croatia's energy transition goals. Here's a look at the projects: Osijek Meat Processing Factory
