What is Lighting Global?

Explore our extensive library of market research and information on our program's activities. Learn more about the off-grid sector and what we do. # Lighting Global is the World Bank's initiative to rapidly increase access to off-grid solar energy for people living without electricity world-wide.

What is the World Bank Lighting Global Program?

The World Bank Group's Lighting Global program developed quality standards for solar kits to drive up, and maintain, a base level of quality within off-grid technologies. These were integrated into the globally recognized International Electrotechnical Commission (IEC) standards in January 2021.

What happened to Lighting Global?

With these developments in mind, IFC mainstreamed much of their Lighting Global work into their operations, and stepped back from their program co-management role in the Summer of 2021, with ESMAP now leading Lighting Global with a renewed focus on continuing to expand access to those that would otherwise be left behind.

What happened to Lighting Africa & Lighting Asia?

With this expansion and a global focus on contributing to the achievement of SDG7 - affordable and sustainable energy access for all - we are retiring the Lighting Africa and Lighting Asia program names, even as we continue to support off-grid solar energy in these regions and beyond, under the Lighting Global program.

Today, there are about 733 million people worldwide living without access to electricity - down from 1.2 billion in 2010. Despite this significant increase, at the current rates of progress, the world will reach only 92 percent electrification by 2030 - falling far short of the SDG7 goal of universal energy for all by 2030.
