

# Guyana solar power for buildings

How is solar energy used in Guyana?

In Guyana, solar energy is used for several purposes, such as drying agricultural produce and irrigation, ICT, and to improve electricity access in rural areas. Under the Hinterland Electrification Programme, over 19,000 solar PV systems had been installed in nearly 200 communities by 2018.

Will Gea supervised solar PV systems in Guyana?

He further added that "the project will also seek to demonstrate the applicability of photovoltaic system operation and its energy contribution in Guyana". According to Dr. Sharma, the solar PV systems installations to be supervised by GEA will total 2.76 MW in 2017 alone.

How many solar home energy systems are distributed in Guyana?

GEA supported the implementation of a massive electrification project to supply, deliver and distribute 30,000 Solar Home Energy Systems to Hinterland and riverine communities in Guyana. A total of 26,398 units were distributed as of December 2023.

Is Guyana a good place to install solar PV?

Most locations across Guyana have excellent solar insolation levels and are ideal for solar PV generation. As of 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW, with an estimated annual generation of 7.16 GWh.

How many mega-scale solar farms are there in Guyana?

Government of Guyana commissioned its second mega-scale solar farm, the 1.5 MW utility-scale solar PV plant at Bartica, Region Seven (Cuyuni-Mazaruni) in March 2023. At twenty-two (22) off-grid locations, GEA installed over 163 kWp of solar PV capacity and 800 kWh of battery energy storage.

How many solar PV farms will Guyana have?

Guyana Power and Light Inc. (GPL) is preparing plans for three utility-scale solar PV farms totaling 30 MW for the national grid in the long term, as well as a 0.75 MW Solar PV Farm at Wakenaam and a 4 MW Solar PV Farm at Onverwagt in the near future.

SOLAR energy installation in Guyana has grown to 173 per cent since 2020, setting the stage for the country to achieve its ambitious energy-transition goals. This is according to President, Dr Irfaan Ali, who during a recent engagement noted that by 2030, the country's energy consumption is projected to increase fivefold, yet the country's ...

Based on savings, a new tender is currently being advertised for the supply and installation of solar PV systems to be installed at an additional 18 Buildings with 382 kWp of new solar PV systems (see table 3 below).

Over 136,000 people in hinterland and riverine communities will benefit from government's solar home energy systems in the first quarter of 2023. This includes the installation of 30,000 - 150 watts solar panels, and provision of batteries and lighting kits.

The Government of Guyana commissioned its second mega-scale solar farm, the 1.5MW utility-scale solar PV plant at Bartica, Region Seven (Cuyuni-Mazaruni) in March 2023. At 22 off-grid locations, GEA installed over ...

GEA welcomes the 2024 budget approval which includes allocations for the construction of a 0.6 MW solar farm for Leguan, completion of the 0.65 MW solar farm at Mahdia, five (5) new solar PV mini-grids at Awarewaunau, Katoka, Maruranau, Yupukari and Nappi in Region Nine and funds for the supply and installation of off-grid solar PV systems at ...

GEA welcomes the 2024 budget approval which includes allocations for the construction of a 0.6 MW solar farm for Leguan, completion of the 0.65 MW solar farm at Mahdia, five (5) new solar PV mini-grids at Awarewaunau, Katoka, ...

Through the use of US\$83.3 million accumulated from Norway to keep Guyana's rainforests intact, the new solar farms promise to add much-needed solar power, an environmentally-friendly source of power, to Guyana's grid.

Even as Guyanese authorities accelerate oil production offshore, strategic steps are being taken to diversify the nation's energy mix. According to the Head of the Guyana Energy Agency (GEA), Dr. Mahender Sharma, Guyana is already hitting major milestones in replacing diesel with solar power through various projects country wide.

The Government of Guyana commissioned its second mega-scale solar farm, the 1.5MW utility-scale solar PV plant at Bartica, Region Seven (Cuyuni-Mazaruni) in March 2023. At 22 off-grid locations, GEA installed over 163kWp of solar PV capacity and 800kWh of battery energy storage.

The first 1,830 solar photovoltaic (PV) home systems which form part of the "30,000 solar PV home systems" initiative are set to arrive in July. Chief Executive Officer of the Guyana Energy Agency (GEA), Dr. Mahender Sharma, made the announcement at the multistakeholder consultation on the presentation of Guyana's Second Voluntary ...
