

Harbin coslight power Cambodia

Which power supplies are made by Harbin coslight?

The DC power supplies, produced by Harbin Coslight Power Co., Ltd., include 220V DC high-frequency switching power supply systems, 48V and 24V high-frequency switching DC power supply systems for telecommunication, charge and intellectual protection and control systems for electric bicycle-based lithium iron phosphate batteries.

Who is Harbin coslight power?

Harbin Coslight Power Co., Ltd. was founded in 1998 with a registered capital of RMB 231,023,000. Up to the end of 2007, its total asset has reached RMB 960,000,000. Presently, it covers a land area of over 170,000 sq.m and the construction area is more than 100,000 sq.m.

Where are coslight lithium batteries made?

The production base of Coslight lithium batteries for vehicles is located in Harbin, occupying 110,000 m², and the building area is 67,000 m². The first stage construction will be completed in 2010, the yearly production capacity of lithium batteries may reach 400,000 KVAh.

How many subsidiaries does Harbin coslight have?

As one of the "Top 100 Electronic Enterprises in China", the Group now has 21 subsidiaries such as Harbin Coslight Storage Battery Co., Ltd. and Harbin Coslight Power Co., Ltd., 13 overseas subsidiaries or offices in Russia, Germany, Britain, Italy, Turkey, the United States, Canada, etc., and a postdoctoral workstation and an institute.

Does coslight Li-ion battery work for HEV buses?

Coslight has provided 40 Ah/345V matching battery system for HEV buses of A Bus Manufactory. The effect of energy saving and emission reduction is especially remarkable. The bus matched with Coslight Li-ion battery can stably save 30% oil of traditional diesel bus for long term, and A Bus Manufactory has signed commercial order with us.

Does coslight provide vehicle batteries?

At present, Coslight has cooperated with many automobile manufacturers and provided vehicle batteries for them. Since 2006, Coslight has researched and developed Li-ion vehicle battery. In 2007, FP1690135A-12AH and FP59143255P-100AH Li-ion battery are put into production in batch.

With the advantages as high integration degree, high reliability, high intelligent degree and good human-machine interface, etc., the intelligent high-frequency switch electric operation power supply system produced by Harbin Coslight Power Co., Ltd. is widely applied in the medium-sized and small power plants, hydropower stations, transformer ...

Harbin coslight power Cambodia

Cospowers Technology Company limited is a leading scientific and technological enterprise in the lithium battery industry and has more than 30 years of experience in technology and product development, On the basis of integrating the high-quality assets and excellent teams of Coslight International Group, Cospowers is determined to become the ...

In the splendid city, Harbin, the company founded Coslight users training center with the first class teaching and living facilities. Each day, the center has to receive the Coslight users from across the country.

Harbin Coslight Power Co., Ltd. is one of the core subsidiaries of the group, with its production capacity of lithium batteries researched and developed by it reaching up to 6GWh, and provides supporting devices for over 10 auto ...

The CL2000 Power Automation Systems, produced by Harbin Coslight Electric Automation Co., Ltd., include substation automation systems, integrated automation systems for electrical power plants, and computer monitoring ...

The production base of Coslight lithium batteries for vehicles is located in Harbin, occupying 110,000 m², and the building area is 67,000 m². The first stage construction will be completed in ...

Information on valuation, funding, cap tables, investors, and executives for Harbin Coslight Power Co.. Use the PitchBook Platform to explore the full profile.

The CL2000 Power Automation Systems, produced by Harbin Coslight Electric Automation Co., Ltd., include substation automation systems, integrated automation systems for electrical power plants, and computer monitoring systems for hydropower stations.
