

Honduras natura energy

How much energy does Honduras use?

The total primary energy offer in Honduras is around 4.62 Mtoe or 53,730.6 GWh. The main source of primary energy is petroleum (53%) followed by combustible renewable and waste (44%), and coal (3%). The residential energy consumption is around 47% of the national consumption, of which 86% are provided by biomass, primarily firewood.

Does Honduras use biomass?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Honduras: How much of the country's energy comes from nuclear power?

Does Honduras need a new infrastructure?

However, national renewable energy and sustainable development ambitions in Honduras face important infrastructure constraints. For example, significant investment is needed to enhance the quality of energy and water services, including improvements in coverage and connectivity.

Does Honduras have electricity?

Honduras has one of the lowest rural electrification rates in Latin America after Nicaragua. About 54 percent of the rural population still lacks access to electricity. In absolute terms, it is estimated that more than 386,000 households or more than 1.93 Million people in rural areas remain without access to electricity.

How many people are without electricity in Honduras?

In absolute terms, it is estimated that more than 386,000 households or more than 1.93 Million people in rural areas remain without access to electricity. The national electricity system is concentrated in the western part of Honduras while the sparsely populated eastern part remains mainly beyond economic line-extension distances.

What is a biofuel tax exoneration in Honduras?

The biofuel production and consumption law (Decree 144-2007) promotes the production of bio-fuel through tax exoneration. This exoneration is valid for a period of 12 years and benefits private companies located in Honduras, which use national raw material to produce energy.

The total primary energy offer in Honduras is around 4.62 Mtoe or 53,730.6 GWh. The main source of primary energy is petroleum (53%) followed by combustible renewable and waste (44%), and coal (3%). The residential ...
