

How much does solar container fitness cost

What are shipping container gyms?

Shipping container gyms are repurposed steel containers (typically 20ft or 40ft in size) transformed into fully functional fitness spaces. Originally designed for cargo transport, their robust structure, modularity, and affordability make them ideal for innovative gym designs.

Are container gyms made to last?

Our container gyms are made to last, using durable steel containers as the base. From compact 20ft builds to multi-container setups, we'll deliver a finished fitness space ready to use from day one. Our custom gym conversions are tough enough for even the strongest athletes, like Eddie Hall!

Can you build a container gym?

We can build your container gym using any size container, but 20ft, 30ft, and 40ft units are typically the most practical. For larger setups, we can also combine multiple containers to create a fully customised training space. See some of the ways our amazing customers are using their containers.

Why should you choose a container gym?

Lower build costs- Save on construction, labour, and materials. Container gyms are a smart solution for creating a high-quality training space without overspending. Compact and space-efficient - Designed to fit your available footprint and easily placed in a back garden, business premises, or a remote site, without the need for large foundations.

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.
