

ib vogt sells 66-MWp Hungarian solar project to MOL Group. Dec 20, 2024, 4:08:14 PM Article by Plamena Tisheva. German solar developer ib vogt GmbH said today it has signed a deal to sell a 66-MWp solar project in Hungary to Hungarian oil and gas company MOL Group. An ib vogt solar farm. ...

MOL currently operates six solar parks in Hungary with a combined capacity of 31.5 MW, in addition to 13.6 MW in Croatia. The company aims to increase its renewable energy capacity to 200 MW by 2026. A key component of this plan is the construction of a 48 MW solar farm in Tisza, northern Hungary, by MOL Petrolkemia, which is expected to be ...

In 2023, 1.6 GW of new solar PV capacity was added to the Hungarian power grid, which - by year's end - hosted over 5.6 GW of solar systems in total. As the market has by now crossed the 6 GW mark, the country has upgraded its solar ambitions.

The Hungarian solar industry has experienced great development, with the biggest expansion last year when 1.6 gigawatts of solar panels were installed, the Energy Minister announced at a press conference in Brussels on Monday.

The MOL group has 6 solar parks in Hungary, with combined capacity of 31.5 MW, and it also has photovoltaic capacity of 13.6 MW in Croatia. In line with its strategy, MOL aims to increase its renewable energy generation capacity to 200 MW by 2026 at group level through further solar park investments in both countries. As part of this, MOL ...

Hungary and China are joining forces to construct one of Central and Eastern Europe's largest solar energy storage facilities. The aim is to double Hungary's energy storage capacity and boost the role of green energy.

International solar developer ib vogt has signed an agreement to sell a 66MW solar PV project to Hungarian MOL Group, a Hungarian oil and gas multinational.

International solar developer ib vogt has signed an agreement to sell a 66 MWp solar PV project to Hungarian MOL Group. The solar farm, located in Ballászeg, Hungary, will begin commercial operation in Q1 2025. This project, ...

Currently, the MOL Group operates six solar parks in Hungary with a combined capacity of 31.5 MW, alongside 13.6 MW of capacity in Croatia. The company plans to expand its renewable generation capacity to 200 MW by ...

MW, alongside 13.6 MW of capacity in Croatia. The company plans to expand its renewable generation capacity to 200 MW by 2026. As part of this plan, MOL Petrolkémia is constructing a 48 MW solar farm in Tiszaújváros (northern Hungary), expected to ...

3 · International solar developer ib vogt has signed an agreement to sell a 66 MWp solar PV project to Hungarian MOL Group. The solar farm, located in Ballószög, Hungary, will begin commercial operation in Q1 2025. This project, the first by ib vogt in Hungary, will contribute to the country's goal of producing 90 percent of its domestic electricity carbon dioxide-free by 2030. ...

On Tuesday, the energy minister announced that industrial-scale solar parks and household solar installations combined have achieved a production capacity of 6,000 megawatts of electricity in Hungary. On sunny days, solar energy alone can meet the country's basic electricity needs, with average consumption ranging from 5,500 to 6,500 MW ...
