What is a Moixa smart battery system?

Moixa Smart Battery systems are designed to be installed alongside solar panels to maximise the use of solar energy in the home and lower the owner's energy bills.

What happened to the Moixa solar battery?

A few years ago, I took part in a local trial to install a solar battery in our home. The battery was excellent - and made a reasonable difference for our energy use. Sadly, last year, it died. It was prototype hardware, and these things happen. Moixa offered to replace it with an updated model - which was generous of them.

How do Moixa batteries work?

Along with smart energy sharing, Moixa help individual homeowners, councils and large property companies manage and reduce their electricity bills. By leveraging advanced technologies as well as AI and machine learning, Moixa batteries adapt to how you use energy in your home.

Is Moixa a regulated company?

We are authorised and regulated by the Financial Conduct Authority under reference number 767876. Moixa is the UK's leading smart battery company. We develop our Smart Battery hardware and GridShare software to facilitate smart energy storage and sharing.

How many hours of energy does a Moixa battery provide?

That means a combined nine million hours of energy have been provided by Moixa batteries nationwide. Their track record in the UK home battery market is unrivalled, as they've amassed over 10 years of research and development, strong international patents and proven technology.

What is Moixa & how does it work?

Moixa is a British cleantech company that develops software and hardware to optimise use of renewable energy. They produce smart batteries that are paired with residential solar panels.

Moixa currently sells a 4.8kWh Moixa Smart Battery in the UK and have a 7.2kWh and 9.6kWh Moixa Optimised Battery System on trial. All units are designed for residential properties to work alongside solar panels and they can also be charged using a time-of-use tariff.

Why Buy a Moixa Solar Battery? Moixa batteries are simple to install so you'll be up and running within a day; You can keep an eye on your energy generation and usage as it's visible in real-time via the Moixa Dashboard; Installing a Moixa ...

4.8kWh Moixa Smart Battery Our flagship product The 4.8kWh Moixa Smart Battery is our most recognised product. It allows solar panel owners to store excess solar energy in a battery so that their home can be powered from self-generated solar energy when needed. It comes with an in-built Moixa Hub which acts as a gateway to our GridShare Software,

2x non-user replaceable battery 40Ah (2kWh) or 60Ah (3kWh) modules. Typical life > 10,000 charge cycles @ <80% DOD (20 years projected) Batteries are rated at max 20A charge / discharge rate.

The Moixa Smart Battery allows you to store electricity charged from your solar panels, rather than sending spare solar energy back to the grid. Can be added to existing solar panels; Store unused solar electricity to power your home in the evening; Charge your Smart Battery from the grid with an off-peak tariff like Economy 7
