

Intelligent energy limited Wallis and Futuna

What does Intelligent Energy do?

Intelligent Energy is a fuel cell engineering company. It is focused on the development, manufacture, and commercialization of its proton exchange membrane (PEM) fuel cell products. The company serves the automotive, stationary power, and unmanned aerial vehicle (UAV) sectors. Intelligent Energy has £5.9 m in annual revenue in FY 2021.

Where is intelligent energy based?

Our headquarters and manufacturing are based in the UK, with our systems being used by our partners and customers worldwide. Intelligent Energy is powering the hydrogen future by developing and manufacturing outstanding zero emission hydrogen fuel cell products.

Who owns Intelligent Energy?

Intelligent Energy was acquired by Meditor Energy, part of the Meditor Group, in October 2017. In 2018, Intelligent Energy announced the launch of its IE-LIFT 802/804 fuel cell modules for power generation applications such as stationary power, micro-grids, telecoms, and critical infrastructure.

What sectors does Intelligent Energy serve?

The company serves the automotive, stationary power, and unmanned aerial vehicle (UAV) sectors. Intelligent Energy has £5.9 m in annual revenue in FY 2021. See insights on Intelligent Energy including office locations, competitors, revenue, financials, executives, subsidiaries and more at Craft.

Where did Intelligent Energy come from?

The origins of Intelligent Energy began at Loughborough University in the UK during the late 1980s, when the University became one of Europe's first research and development centres for proton-exchange membrane (PEM) fuel cell technology. In 1995, the UK's first kW-level PEM fuel cell stack was produced by the R&D team.

What is Intelligent Energy IE-lift 802/804?

In 2018, Intelligent Energy announced the launch of its IE-LIFT 802/804 fuel cell modules for power generation applications such as stationary power, micro-grids, telecoms, and critical infrastructure. Intelligent Energy's fuel-cell technology is divided into two platforms: air-cooled (AC) and evaporatively-cooled (EC).

Intelligent Energy, a privately funded company, is installing a state-of-the-art Enapter AEM electrolyser and testing facility at Chelveston, which will be operational by 2025. The electrolyser will use energy generated by the ...

Intelligent energy limited Wallis and Futuna

registered office address, filing history, accounts, annual return, officers,...

Intelligent Energy is a fuel cell engineering business focused on the development, manufacture and commercialisation of its proton-exchange membrane fuel cell technologies for a range of markets including automotive, stationary power, materials handling equipment and UAVs.

Intelligent Energy is a leading clean power systems company specialising in the application of fuel cell technologies in a number of industrial sectors, including automotive.

Intelligent Energy (IE) is a world leading fuel cell engineering business built on 30 years" experience in the development of zero-emission fuel cells. It is focused on the development, ...

Intelligent Energy, a privately funded company, is installing a state-of-the-art Enapter AEM electrolyser and testing facility at Chelveston, which will be operational by 2025. The electrolyser will use energy generated by the park to produce more than 100,000kg of green hydrogen annually, powering the fuel cells, a key technology that is ...

Intelligent Energy is a fuel cell engineering business focused on the development, manufacture and commercialisation of its proton-exchange membrane fuel cell technologies for a range of ...

Intelligent Energy has 5 employees across 3 locations and £9.05 m in annual revenue in FY 2023. See insights on Intelligent Energy including office locations, competitors, revenue, financials, executives, subsidiaries and more at Craft.

Intelligent Energy is powering the hydrogen future by developing and manufacturing outstanding zero emission hydrogen fuel cell products.

Intelligent Energy has 5 employees across 3 locations and £9.05 m in annual revenue in FY 2023. See insights on Intelligent Energy including office locations, competitors, revenue, financials, ...

Intelligent Energy is a power technology company that specialises in the development of Proton Exchange Membrane (PEM) fuel cells for application in the automotive, consumer electronics and stationary power markets. Based in the UK, the company also has offices in India, Japan and the USA and employs approximately 300 people.

Intelligent Energy (IE) is a world leading fuel cell engineering business built on 30 years" experience in the development of zero-emission fuel cells. It is focused on the development, manufacture and commercialisation of its lightweight, high efficiency fuel cell technologies which are based on its large portfolio of patents.
