

Intersect power Dominica

Who is intersect power?

Intersect Power is a clean energy company bringing innovative and scalable low-carbon solutions to its customers in retail and wholesale energy markets. Intersect Power had the honor of serving as the presenting sponsor for the 2024 'Reading with RUCKUS' literacy education program, in partnership with the Amarillo Sod Poodles!

Will Google & intersect power co-locate a data center?

Together, Google, Intersect Power and TPG Rise Climate will develop industrial parks with gigawatts of data center capacity in the U.S., co-located with new clean energy plants to power them. The first phase of the first co-located clean energy project is expected to be operational by 2026 and fully complete in 2027.

What will Google do with intersect power?

When Intersect Power builds new clean energy assets in regions and projects of interest, Google will be able to provide power offtake as an anchor tenant in the co-located industrial park that would support data center development.

What makes intersect power flexible?

At Intersect Power, flexibility fuels our impact. As a fully flexible team, we prioritize building strong connections and a collaborative culture.

Why is intersect power partnering with Morgan Stanley?

"We are proud to again partner with Intersect Power by providing them capital to help accelerate their scalable and innovative approaches to decarbonizing energy sources," said Jorge Irargorri, Managing Director and Head of the Alternative Financing Group at Morgan Stanley.

What is intersect & how does it work?

And Intersect is just getting started. To avoid the worst impacts of climate change, Intersect is laser-focused on the multi-gigaton levers that have the potential to get the planet to net zero emissions without any new breakthroughs. For Sheldon and the Intersect team, meeting global climate targets is not an aspiration; it is a requirement.
