

What is Ireland's high-voltage electricity grid?

We plan, manage and develop Ireland's high-voltage electricity grid for a sustainable future. This grid is connected to the lower voltage distribution system managed by ESB Networks, Ireland's Distribution System Operator (DSO), which supplies power directly to homes and business around the country.

What are electrical cabinets used for?

In the energy industry, electrical cabinets are instrumental in power distribution and control. They are deployed in power plants, substations, and renewable energy facilities to house switchgear, control panels, and monitoring systems.

What is a rack power distribution unit?

These Power Distribution Units are optimised for use in data and server cabinets. Available for mounting horizontally and vertically, they will help provide all your rack power needs. We hold stock of a full range of PDU's with a choice of various input and output options Rack Power Distribution Unit with IEC 320 C13 Sockets and UK Plug Input -...

How are electrical cabinets tested?

Electrical cabinets are also tested for their ability to withstand various environmental conditions. In some cases, additional components such as hinges, locks, mounting brackets, and sealing gaskets are installed. If the cabinet is part of a larger system, it may be integrated with other components and systems at this stage.

What are electrical enclosure cabinets?

In the manufacturing sector, electrical enclosure cabinets are the backbone of automation and control systems. These cabinets house electrical components such as PLCs (Programmable Logic Controllers), relays, and motor controllers, facilitating seamless operations on the factory floor.

Why do Irish companies use GRP electrical enclosures?

This is why Irish companies have been using Tricel's GRP electrical enclosures for over 40 years. Ideal for outdoor usage, GRP enclosures keep dust, dirt, and water out and ensure your equipment is kept safe. Made of Glass Reinforced Polyester (GRP), they are extremely hard-wearing, weather-resistant, durable, and great value for money.

At Envirograf Ireland we distribute Envirograf's Electrical Consumer Unit And Distribution Board Fire Protection System, brings existing combustible consumer units in line with regulations without the need to replace them entirely. For up to 1 hour protection for consumer units, fuseboxes, and switch boxes along escape routes such as staircases or corridors.
