

Jersey solar financing companies inia

How much does a solar system cost in New Jersey?

Compare Quotes From Top-rated Solar Panel Installers In New Jersey, the average cost of installing a residential solar system is \$2.75 per watt, or \$13,750 for a 5-kW system, before any tax credits or incentives are included. A solar panel system of 5 to 8 kW is a good size for most New Jersey homeowners.

What solar incentives are available in New Jersey?

The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage. Some states and utility companies offer additional solar incentives, saving homeowners even more money. Here are the solar incentives available in New Jersey:

Are solar loans a good idea in New Jersey?

Solar loans are popular among homeowners because you don't have to have the money for the installation upfront, but you get better lifetime savings than with a leased system. You also get to directly use the incentives (tax credits, rebates, etc.) available in New Jersey, rather than a leasing company retaining them.

Are solar panels a good investment in New Jersey?

With the cost of electricity rising, solar panels can help to offset your utility bills. In New Jersey, the average cost of electricity is higher than the national average, making the potential savings from solar even greater. Plus, with net metering, you can earn credits for the excess electricity your system produces.
