

Jersey solar power unit

Why is solar important in Jersey?

Solar is a vital component of modern homes in Jersey, contributing to the state's renewable energy and energy management. For those focused on the bottom line, solar serves as a safeguard against rising grid electricity costs.

Who installed the largest commercial solar installation in Jersey?

SunWorks was contracted by Jersey Electricity to install the Channel Islands' largest solar installation at Jersey Dairy, a total of 1,516 Solar panels. This saw the start of JE's lease scheme for commercial building owners and enabled SunWorks to deliver a world-class commercial solar installation in Jersey.

What happened to Jersey electricity?

The first SunWorks project was completed for Jersey Electricity at the La Collette Energy Division building. After moving to Regus Offices in St. Helier, the company's capacity for installation significantly increased. This year, 41 installations were completed, bringing the total number of SunWorks solar sites on the island to over 115.

What happened to solar in Jersey (at SunWorks)?

Despite the global Pandemic, solar continued to grow at SunWorks in Jersey. In 2021, the company moved its headquarters to St Helier Business Park and was able to install solar panels there.

How can Sunworks make a more diverse energy future for Jersey?

Sunworks is striving to make a more diverse energy future for Jersey by providing the best advice, service, and solar technology. We look forward to a time when Jersey can say it makes the best use of its resources and is an example to other offshore jurisdictions. Sunworks' efforts towards this goal are integral to modern homes being connected and integrated.

How many solar panels are installed in the Channel Islands?

This year, 1,516 solar panels were installed in the Channel Islands, making it the largest installation. SunWorks was contracted by Jersey Electricity to install these panels.

Solar electricity is green renewable energy and doesn't release any harmful carbon dioxide or other pollutants. A typical home solar PV system could save over a tonne and a half of carbon dioxide per year - that's more than 30 tonnes over its lifetime.

Unrivalled experience of solar in Jersey. Built up from years of experience over hundreds of local installations since 2013, we guarantee the best service and installation quality. The company has matured with a focus on energy optimisation along side solar as its core product.

In a corner of St Clement near the Grouville border, hidden away down a narrow lane, a fascinating renewable energy project is taking shape: Jersey's first large-scale, ground-mounted solar array. On completion - hopefully by the end of the year - the Jersey Electricity array will produce over 4MW of electricity a year, enough to...

A solar power system that is connected to the electricity grid, allowing homeowners to use both solar energy and grid power. H - Heat Battery A heat battery, also known as a thermal energy storage system, is a device or system used to store and release heat energy for later use.

New Jersey solar removal and reinstallation. ... Solar power systems are built to be durable, with components lasting anywhere from 20 - 30 years. But depending on the age and condition of your roof, you may need to perform repairs to areas that are covered by solar panels. ... 340 E Broad St Unit 1A Burlington, NJ 08016; 4600 Enterprise ...

Jersey Solar Power Systems is a leading solar energy solutions provider located in Jersey City of the city, USA. With years of experience and a team of skilled experts, we supply several top-quality solar equipment. We are also involved in the professional installation of new solar equipment and maintenance of existing ones.

First, ground mounted solar is more efficient and cheaper. Panels can be perfectly orientated, and because the installation is large, the unit costs fall. Second, the two are not mutually exclusive - Jersey should pursue (and is pursuing) rooftop solar and ground based arrays. There's room for both.

Harness the energy from our own domestic solar installation to power your home's appliances and heat your hot water with our unique Smart Solar offer, when switching to electric heating.

Solar power technologies harness the energy from the sun's light and converts it into electricity. Solar photovoltaic panels, (Solar PV panels), are made up of individual cells made of silicon or other special material. When the sun hits the solar panel the photons from the sunlight are absorbed by the cells, creating an electric field and causing electricity to flow.
