

Job content of solar container technology inspector

Why do solar photovoltaic plants need verification & inspection services?

For this reason, verification and inspection services in solar photovoltaic plants are essential to ensure the quality of the modules and check their performance. This is especially relevant during the construction and development phases of the project, as well as in the subsequent operation.

What services are provided at a photovoltaic plant?

Inspection of container loading. Services on site at photovoltaic plants (Post-shipment): these services are carried out after transport from origin to where the client requires it, whether at the plant, destination port or any other location. The following tests are included at the client's request:

How many photovoltaic modules can a laboratory test per day?

This laboratory can test more than 200 photovoltaic modules per day with an uncertainty of less than 3%. Due to its characteristics, it is capable of testing modules of up to 1400 x 2700 mm of different types (high efficiency crystalline modules, bifacial modules, thin film modules and PERC or HJT solar cells).
