Note that expressions for the KdV and eeKdV behave here in the exact same way, in the sense that an expression for the horizontal fluid velocity corrected to a given power in the parameter  $\eta$  inserted into the general non-dimensional shallow water energy flux expression will provide energy flux expressions for KdV and eeKdV that are correct to ...

One of the most interesting freatures of the KdV is the existence of infinitely many conservation laws. Lets begin with some basics of conservation laws. If we can write our equation of the form ... This corresponds to conservation of energy. It turns out that there is an infinite number of conserved quantities and we give here the proof of ...
