

Kek energy Thailand

What does KEK stand for?

Kosovo Energy Corporation J.S.C. (Albanian: Korporata Energjetike e Kosovës, abbreviated as KEK) is a company based in Kosovo engaged in generation of electricity and allied activities. Its capacity is estimated to be around 1480+MW.

Who buys electricity in Thailand?

Major buyers include government-owned electric power authorities, including the Electricity Generating Authority of Thailand (EGAT), the Metropolitan Electricity Authority (MEA), the Provincial Electricity Authority (PEA), private power producers (IPPs, SPPs, VSPPs), and industrial estate developers.

Does Thailand import hydropower from Lao PDR?

The country also imports hydropower from Lao PDR. Thailand has renewed its focus on increasing its renewable energy capacity to meet the country's climate goals of carbon neutrality by 2050 and net zero greenhouse gas emissions by 2065, announced at COP26.

What is the power generating capacity in Thailand?

The total installed power generating capacity in Thailand is approximately 53 gigawatts as of December 2022 generated by EGAT, independent power producers (IPPs), small power producers (SPPs), very small power producers (VSPPs), and imports. Renewable energy capacity is around 23% of the total installed capacity.

Does Thailand have a potential for biopower?

The country also has a high potential for biopower, arising from an abundance of feedstock resources for biomass, biogas, and biofuels. Thailand is currently carrying out pilot projects for the development of an advanced grid system to better manage the grid volatility that accompanies the introduction of renewable energy.

Does Thailand need liquefied natural gas?

Thailand faces energy security challenges. Approximately 60 percent of electric power in Thailand is generated from natural gas. With domestic gas reserves projected to dry up in the next 10-20 years, liquefied natural gas (LNG) will play a critical role in ensuring long-term electricity security.
