When investigating solar panels there are many questions: how many panels can my roof take? what will they look like? the price? how much power generated? yearly returns? go green use technology to help answer these questions as accurately as possible.

Solar panel electricity systems, also known as photovoltaics (PV), capture the sun's energy using photovoltaic cells. The cells convert the sunlight into electricity, which can be used to run household appliances and lighting. These cells don't need direct sunlight to work - they can still generate some electricity on a cloudy day.
