After getting independence by the country, on the basis of existing energy facilities in 1993 the "Kyrgyzgosenergoholding" company was established that performed its activities on the self-supporting principle and consisted of 16 different enterprises involved in the production, transmission and distribution of electricity and heating energy.

Is Kyrgyzstan a member of the Eurasian Economic Union?

Kyrgyzstan also became a member of the Eurasian Economic Union (EAEU) in 2015. Kyrgyzstan's total primary energy supply (TPES) was 3.9 million tonnes of oil equivalent (Mtoe) in 2015 and reached 4.6 Mtoe in 2018. Total final consumption (TFC) totalled 4.2 Mtoe in 2018,and is growing rapidly (+72% since 2008).

Where does power come from in Kyrgyzstan?

In Kyrgyzstan's predominantly mountainous terrain,winds of constant direction and strength sufficient for power generation can only be found in remote and sparsely populated areas.

As Kyrgyzstan constructs a modern national identity, a social institution long considered to be a vestige of the past - lineage identity - continues to exert significant influence over the process. This fact needs to be recognized and addressed. Lineage affiliations have gained new relevance in Kyrgyz society in the post-Soviet era.

Kyrgyzstan: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen

country across all of the key metrics on this topic.

Kyrgyzstan has considerable untapped renewable energy potential. Existing renewable energy consists of large HPPs, which account for 30% of total energy supply, but only 10% of hydropower potential has been developed.

Developing sustainable energy and improving energy efficiency are also priorities. Energy sector ties with China have been strengthened in recent years, and China financed several key Kyrgyz development projects. Kyrgyzstan also became a member of the Eurasian Economic Union (EAEU) in 2015.
